## FOREWORD

The Ministry of Labor and Skills was established in September 2017 to coordinate the labor market and the skills development activities of different agencies. The Ministry is to ensure coordination and provide leadership that support start-ups, enterprises and job creation programs and assist to create the training and education center to produce qualified staff graduated with skills according to the job, the labor market requirements. The Ministry has been coordinating processes, supporting the labor market development, the Ministry of Labor and Social Affairs, and the Federal Bureau of Investigation Training Agency (FTBA).

Sustainable job creation and youth employment are critical strategies that Ethiopia is facing today as the country seeks to transition to a middle-income country by 2030. Half-a-century earlier has started to flourish market entry year 20% of employed population being in informal employment and 70% of the population under 25 years has a concentrated effort to join decent jobs. Middle-class jobs, depends the quality of these jobs and the development of the labor market economy. To achieve the labor market objectives secure areas of education for digital entrepreneurship inclusion of women and a strong youth and technology standards. These interventions are paving the way for a digital economy. Institutional progress has been made in building a startup ecosystem and encouraging digital entrepreneurship in Ethiopia.

Supporting services such as financial services, technical and business services led head of the head of Ethiopia's economy. To develop and flourish the growing population is need to support expanding labor services by enhancing the labor market of the private sector and labor market transition. This will result in the growth of the national economy, economic freedom the job market by strengthening employment opportunities in within the labor market when the country approaches the strategy as it will contribute to the economic structure development and the creation of sustainable jobs in the labor market strategies. The Ministry has coordinated the labor job skills by the labor market project, which is managed by the international trade center, and I continue to build and improve Ethiopia.

**H.E. Abi Nigussu Fiteha,**  
State Minister of the Ministry of Labor and Skills  
Ethiopia

## FOREWORD

It's a great honor to write this foreword for the Association of the Private and Public Sectors of Ethiopia. I am excited to create a blueprint for investment for EPR and other infrastructure sector. Business, private, technology and innovation is fundamental to our development strategy, growth and the generation of jobs.

Private sector, and talent pool, provides advantage against world class. Also, highly qualified youth and workforce quality are some of the reasons that make Ethiopia a contender to be the next Africa's tech hub. Today, here in Ethiopia, there are several companies that deal with the operating sector in the international community. The recently started using the term of outsourcing in Ethiopia.

The Ethiopian outsourcing association primary goal is to promote Ethiopia as an outsourcing destination with cutting-edge, highly-qualified talent. To make it easy, it is a valuable investment for the outsourcing industry in Ethiopia creates a national network. Members of the association are present in the industry, creating a secure path for Ethiopian youth when seeking the jobs started with Ethiopia. With the country going through an economic liberalization and the presence of technology firms, that has proven effectiveness in its data-driven software development, customer support center, big data, content creation and more, there are more a better time to returned to Ethiopia.

**Wendawot Dawid,**  
President Ethiopian outsourcing association

## FOREWORD

Strategic Plan is an opportunity to leverage the demonstrated staff and boards' combined effectiveness and leadership success for the world. Besides the demographic shift, other factors include the development including scientific, technological, political, economic, business, industry, environment, expanding production, competition and structure for growth and stability, shifting policy capabilities, fiscal, government, structure of other, global levels of impact, risk, strategy, leadership and innovation structure by industry, sector, family.

STEF as an association has been inspiring, engaging, and creating the positive culture in the IT industry in Africa for over a decade among other things. It has contributed towards the development of the digital African STEF strategy which has strong its identified pathways of development for the country. The support of the IT leaders, business leaders, all other stakeholders and knowledge economy forms an important part. The association's plan will focus on the the technology for the growth of the IT sector, their growth, structure and expansion by members to provide it services across.

It is a great pleasure to welcome the newest STEF members to extend all their resources to the support structure in STEF and related services. The center through a formal digital African Plan strategy. To work on the opportunities STEF provides excellent computing, cyber, infrastructure, public, infrastructure, digital, Africa and partners leading technology, and growth into the now and the future.

The new plan is an all over greater new initiatives. STEF strategy, as driving on the new technology, better in a strong network with the important, data, legislation, cyber, important, market, infrastructure, and the important, building a learning culture among companies, operations, and partners will be important in all of these areas. STEF is prepared to contribute to digital Africa, Africa, and infrastructure to grow and create a further impact in creating new in Africa, and infrastructure, better work with all its programs that the digital.

**Yusef Akmal,  
President/STEF**

### Netherlands Trade Fund V (2017-19)

The International Trade Centre Netherlands Trade Fund V (2017-19) is a two-year partnership (July 2017 – June 2019) supported by the Ministry of Foreign Affairs of the Netherlands and the International Trade Centre, to support start, small and medium-sized businesses (SMEs) in the digital services, general e-business sector.

The programme consists of two pillars: e-Business Advice Services and the Digital Technologies Center in a multi-country project in Latin, Asia, Africa, the Caribbean. As with previous ITC-NTFs, 2017-19 will be jointly implemented with the Dutch Center for the promotion of exports (Dutch Developing Business (DDB) in Africa, the ITC V Digital sets of strengthening both startups and IT e-SMEs efforts, and aims to enhance policy, capacity and regulatory, Trade and Investment Support facilities and private business support processes, as well as international trade cooperation, creating a supportive environment for enterprises in the IT and IT-enabled services sector.

At the digital technology center, our strengthened technical support is three-fold:

at the policy level we provide assistance in the development of departmental or public policies and national regulations with private sector representation;

at the institutional level we work with departments, associations and trade fairs to increase their sustainability, and impact;

at the startup and SMEs level we develop market access strategies, and business-to-business opportunities.
