# World Tariff Profiles 2016

Applied MFN tariffs

---

## About this publication

*World Tariff Profiles* is a co-publication of the WTO, ITC and UNCTAD on market access for goods. This annual publication provides comprehensive information on the tariffs and non-tariff measures imposed by over 170 countries and customs territories. Non-WTO members are included if data on the tariffs they applied in 2014 or 2015 are available in the databases of the WTO, ITC or UNCTAD.

## For more information

The statistical tables included in this report can be downloaded from the WTO web site at [www.wto.org/statistics](http://www.wto.org/statistics)

The map on the cover represents the latest available average MFN tariffs applied by countries/customs territories. These tariffs (in %) are grouped into eight categories. Data are sourced from this publication (covering 2014 and 2015) and from previous publications if more recent data are not available. The boundaries shown on the map do not imply any judgment, official endorsement or acceptance by the WTO as to the legal status or frontier of any territory.

# General note and abbreviations

## Abbreviations

AVG	Average
AG	Agricultural products
AVE	<i>Ad valorem</i> equivalent
HS	Harmonized System (nomenclature)
Max	Maximum duty
MFN	Most favoured nation
NAV	Non- <i>ad valorem</i> duty
Non-AG	Non agricultural products
SSG	Special safeguards
TL	Tariff line
UV	Unit value

## Notations

–	Not applicable
0	= 0 (not rounded)
0.0	>0 and <0.05
100	=100 (not rounded)
100.0	>99.95 and <100
Blank	Bound or applied duties and/or imports are not available at all for a given country or territory.
<i>Italics</i>	Maxima, based on AVE estimates are printed in italics; this also applies in cases when the <i>ad valorem</i> is part of a compound or mixed duty as ceiling or floor.
US\$	United States dollar

The statistics related to applied tariffs and imports are calculated using data which are based on the HS nomenclature adopted by the country for the reference year. For statistics on bound tariffs, the calculations are based on the approved schedule of concessions of the WTO member. In previous issues of World Tariff Profiles, each schedule is based on the HS version which the member used when it acceded to the WTO. Starting with the 2010 issue of this publication, bound tariff statistics are based on the approved schedule of concessions for each member in the most recent HS version. This might have some implications on the historical series of various bound tariff indicators affected by the use of a different nomenclature. While the member's commitments have not changed as a result of the transposition, some aggregate statistics might have been affected as a consequence of the change to another HS version.

The classification of products into agricultural and non-agricultural is based on Annex 1 of the WTO Agreement on Agriculture which lists all products covered in the Agreement. The Annex enumerates HS codes that are subject to the agriculture negotiations in the WTO and are considered agricultural products. HS codes which are not in Annex 1 are subject to the non-agricultural market access negotiations and are considered non-agricultural products.

In the comparison of bound and applied duties within countries and across countries, the following caveats need to be taken into account besides that of the effects of different HS versions used and nomenclature breakdowns. These are: (1) binding coverage; (2) tariff bindings not fully implemented; and (3) AVEs.

- While binding commitments cover all agricultural products, in principle, this is not always the case for non-agricultural goods. There are a number of WTO members where the binding coverage for non-agricultural products is less – and sometimes much less – than 100 per cent. Also, a number of developed countries have not yet fully bound all the tariff lines in their schedules. Any comparison of bound and applied tariff indicators is only valid in cases of full binding coverage.
- For most WTO members, except the most recently acceded ones, all commitments dating back to the Uruguay Round have by now been implemented. In cases where commitments are not yet fully implemented, one may see MFN applied averages or maxima exceeding the corresponding bound duty indicators.
- Last but not least, the calculation of AVEs may affect the comparison between bound and applied duties when the changes in nomenclature have resulted in the use of different unit values. In other cases, bound duties have been expressed in a way that is not directly comparable with the currently used applied duties. In a number of cases, the estimated MFN applied AVEs were adjusted when the corresponding bound tariff lines were defined in *ad valorem* terms. In these cases, the corresponding bound *ad valorem* duty was used as ceiling for the AVE estimate.

# Introduction

## WTO

The World Trade Organization (WTO) is the only global international organization dealing with the rules of trade between nations. At its heart are the WTO agreements, negotiated and signed by the bulk of the world's trading nations and ratified in their parliaments. The goal is to help producers of goods and services, exporters, and importers conduct their business. The WTO's main function is to ensure that trade flows as smoothly, predictably and freely as possible. It does this by administering trade agreements, acting as a forum for trade negotiations, settling trade disputes, reviewing national trade policies, assisting developing countries in trade policy issues through technical assistance and training programmes and cooperating with other international organizations.

## ITC

The International Trade Centre (ITC) is the joint agency of the World Trade Organization and the United Nations. ITC enables small business export success in developing countries by providing, with partners, sustainable and inclusive trade development solutions to the private sector, trade support institutions and policymakers. ITC's strategic objectives are to strengthen the international competitiveness of enterprises, to develop the capacity of trade service providers to support businesses, and to support policymakers in integrating the business sector into the global economy.

## UNCTAD

Established in 1964, the United Nations Conference on Trade and Development (UNCTAD) promotes the development-friendly integration of developing countries into the world economy. UNCTAD has progressively evolved into an authoritative knowledge-based institution whose work aims to help shape current policy debates and thinking on development, with a particular focus on ensuring that domestic policies and international action are mutually supportive in bringing about sustainable development.

The *World Tariff Profiles* is a joint publication of the WTO, ITC and UNCTAD devoted to market access for goods. This statistical yearbook contains a comprehensive compilation of the main tariff parameters for each of the 164 WTO members plus other countries and customs territories where data is available. Each tariff profile presents information on tariffs imposed by each economy on its imports complemented with an analysis of the market access conditions it faces in its major export markets.

Statistics for all countries and territories are given in standardized tables which allow easy comparisons between countries/territories, between sectors and, specifically for WTO members, between bound and applied tariffs as well. The calculations are based on national tariff schedules and imports in conformity with a standard Harmonized System (HS) nomenclature version. To the extent possible, *ad valorem* equivalents (AVEs) of non-*ad valorem* tariffs are estimated and are included in the estimation of tariff indicators. Nonetheless, certain caveats apply in the interpretation of these indicators and the reader is advised to read the methodological notes that precede the statistical tables.

The publication is presented in five main parts. The first part shows summary tariff statistics for all countries and territories for all products, as well as a breakdown into agricultural and non-agricultural products. The second part shows for each of these countries and territories one full page with disaggregation by sectors and duty ranges. It also contains a section on the market access conditions faced in their respective major export markets. A new third part has been added to this edition to cover information on non-tariff measures which are of increasing importance in international trade. The fourth part contains the special topic which focuses this year on the 2017 version of the Harmonized System. The annexes are in part five and include the data sources and the compilation of "Frequently Asked Questions".

The **summary tariff tables** in the first part are designed to allow cross-country comparison as well as comparison of the levels of bound and applied duties. Apart from the standard indicators like tariff averages, maxima, percentage of duty-free tariff lines, peaks and non-*ad valorem* duties, it also contains indicators of tariff dispersion such as the number of distinct duties and the coefficient of variation. The calculation of these indicators is based, where applicable, on a pre-aggregation to HS six-digit subheadings, which leads to a standardization across countries and thus makes the comparisons more compatible.

The **tariff profiles** tables are divided into two blocks covering (A) the domestic market access protection and (B) the protection faced in the major export markets. In part A, information on bound and applied duties is shown by duty ranges and by sectors. Information for agricultural and non-agricultural duties is shown separately. In addition, there are indicators on the occurrence of special safeguards and on tariff quotas. In part B, the trade diversification and market access conditions in the five major export markets are depicted, broken down into agricultural and non-agricultural products.

The third part includes a brief overview of the classification of non-tariff measures as well as summary tables on anti-dumping actions, countervailing duties and safeguard measures. The new special topic on the "2017 Version of the Harmonized System" is of special relevance in this 2016 edition as most customs offices are preparing for the transition to this new version of the HS nomenclature as of January 2017.

## Description of column headings

Column headings	Description or method of calculation
Year of MFN applied tariff	Calendar year or start of fiscal year
Binding coverage	Share of HS six-digit subheadings containing at least one bound tariff line. Full binding coverage is indicated by 100 without further decimals. If some tariff lines are unbound but the result still rounds to 100 this is reflected by maintaining one decimal, i.e. 100.0.
Simple average	Simple average of the <i>ad valorem</i> or AVE HS six-digit duty averages.
Duty-free	Share of duty-free HS six-digit subheadings in the total number of subheadings in the product group. Partially duty-free subheadings are taken into account on a <i>pro rata</i> basis.
Non- <i>ad valorem</i> duties	Share of HS six-digit subheadings subject to non- <i>ad valorem</i> duties. When only part of the HS six-digit subheading is subject to non- <i>ad valorem</i> duties the percentage share of these tariff lines is used.
Duties > 15 %	Share of HS six-digit subheadings subject to <i>ad valorem</i> duties or AVEs greater than 15 per cent. When only part of the HS six-digit subheading is covered by such duties, the calculation is done on a <i>pro rata</i> basis.
Duties > 3 * AVG	Share of HS six-digit subheadings subject to <i>ad valorem</i> duties or AVEs greater than three times the national average. When only part of the HS six-digit subheading is covered by such duties, the calculation is done on a <i>pro rata</i> basis.
Concessions not yet implemented in 2015	Share of HS six-digit bound subheadings not yet implemented in 2015. When only part of the HS six-digit subheading is covered by such duties the calculation is made on a <i>pro rata</i> basis.
Maximum duty	Maximum tariff line level <i>ad valorem</i> duty or AVE.
Number of distinct duty rates	Number of distinct duty rates. Non- <i>ad valorem</i> duties are always treated as distinct because AVE calculations would always yield distinct AVEs. For this indicator, however, duties not provided are not included in the count.
Coefficient of variation	Standard deviation of tariff line duty rates divided by the simple tariff line level average of all duty rates. Includes only <i>ad valorem</i> duties or AVEs.
Number of MFN applied tariff lines	Total number of MFN applied tariff lines

# Technical notes

---

Only duties and imports recorded under HS Chapters 01-97 are taken into account. Each applied tariff schedule is validated against the standard nomenclature at the HS six-digit subheading level of the HS version adopted by the country for the reference year. National tariff lines that do not follow this standard (i.e., the first six digits should be based on the standard subheading nomenclature of the HS version used by the country) are discarded and not taken into account. On the other hand, missing subheadings are added. Hence, all calculations

are based on the complete standard nomenclature. All simple averages are based on pre-aggregated HS six-digit averages. Pre-aggregation means that duties at the tariff line level are first averaged to HS six-digit subheadings. Subsequent calculations are based on these pre-aggregated averages.

To the extent possible, non-*ad valorem* duties are converted into *ad valorem* equivalents. The methodology used for the conversion is in Technical Annex B of *World Tariff Profiles 2006*.

1. The information provided by the European Union (formerly European Communities) covers its 28 member states.

2. The information provided by Switzerland covers Liechtenstein.

## Part A.1 Tariffs and imports: Summary and duty ranges

Row titles	Description or method of calculation
Simple average final bound	Simple average of final bound duties excluding unbound tariff lines.
Simple average MFN applied	Simple average of MFN applied duties.
Trade weighted average	HS six-digit MFN tariff averages weighted with HS six-digit import flows for traded national tariff lines.
Imports in billion US\$	Imports in billion US\$.
Binding coverage	Share of HS six-digit subheadings containing at least one bound tariff line. The percentage share is also presented separately for non-agricultural (Non-AG) tariff lines. Full binding coverage is indicated by 100 without further decimals. If some tariff lines are unbound but the result still rounds to 100 this is reflected by maintaining one decimal, i.e. 100.0.
AG: Tariff quotas (in %)	Per cent of HS six-digit subheadings in the schedule of agricultural concession covered by tariff quotas. Partial coverage is taken into account on a <i>pro rata</i> basis.
AG: Special safeguards (in %)	Per cent of HS six-digit subheadings in the schedule of agricultural concessions with at least one tariff line subject to Special Safeguards (SSG). Partial coverage is taken into account on a <i>pro rata</i> basis.

### Technical notes

Only duties and imports recorded under HS Chapters 01-97 are taken into account. Each applied tariff schedule is validated against the standard nomenclature at the HS six-digit subheading level of the HS version adopted by the country for the reference year. National tariff lines that do not follow this standard (i.e., the first six digits should be based on the standard subheading nomenclature of the HS version used by the country) are discarded and not taken into account. On the other hand, missing subheadings are added. Hence, all calculations are based on the complete standard nomenclature. All simple averages are based on pre-aggregated HS six-digit averages. Pre-aggregation means that duties at the tariff line level are first averaged to HS six-digit subheadings. Subsequent calculations are based on these pre-aggregated averages.

To the extent possible, non-*ad valorem* duties are converted into *ad valorem* equivalents. The methodology used for the conversion is in Technical Annex B of *World Tariff Profiles 2006*.

## Part A.2

### Tariffs and imports by product groups

#### Frequency distribution by duty ranges

The shares by duty ranges in the frequency distribution are based on the *pro rata* shares of tariff line level duties in the standard HS six-digit subheadings. For example, if there are two tariff lines in one HS six-digit subheading, one with a duty of 10 and one with a duty of 20, then half of the HS six-digit subheading is allocated to the 5-10 range and the other half to the 15-25 range. The frequency distribution includes AVEs whenever those were calculated. The percentages by duty ranges add up to 100 per cent for MFN applied duties unless there are non-computable AVEs or missing tariff lines for which no separate category was allocated. For bound duties, the duty ranges add up to the percentage of the binding coverage unless there are non-computable AVEs or missing tariff lines. Please note that the use of different nomenclatures for bound and MFN applied duties affects the comparability of bound and MFN applied duty shares by frequency ranges.

When trade is available at the tariff line level, imports are allocated on a tariff line basis to the respective duty ranges. Otherwise, HS six-digit imports are allocated on a *pro rata* basis to duty ranges, e.g. if there are two tariff lines in one HS six-digit subheading, one with a duty of 10 and one with a duty of 20 then half of the HS six-digit imports are allocated to the 5-10 range and the other half to the 15-25 range.

Share of HS six-digit subheadings subject to non-*ad valorem* duties: when only part of the HS six-digit subheading is subject to non-*ad valorem* duties, the percentage share of these tariff lines is used.

Column heading		Description or method of calculation
Final bound duties	AVG	Simple average of final bound duties excluding unbound tariff lines
	Duty free	Share of duty-free HS six-digit subheadings in the total number of subheadings in the product group. Partially duty-free subheadings are taken into account on a <i>pro rata</i> basis.
	Max	Highest <i>ad valorem</i> duty or calculated AVE within the product group
	Binding in %	Share of HS six-digit subheadings containing at least one bound tariff line. Full binding coverage is indicated by 100 without further decimals. If some tariff lines are unbound but the result still rounds to 100 this is reflected by maintaining one decimal, i.e. 100.0.
MFN applied duties	AVG	Simple average of MFN applied duties.
	Duty free	Share of duty-free HS six-digit subheadings in the total number of subheadings in the product group. Partially duty-free subheadings are taken into account on a <i>pro rata</i> basis.
	Max	Highest <i>ad valorem</i> duty or calculated AVE within the product group
Imports	Share in %	Share of imports falling under product group
	Duty free in %	Share of MFN duty-free imports falling under product group in total imports in that product group. Partially duty-free subheadings are taken into account on a <i>pro rata</i> basis if tariff line imports are not available.

## Part B

### Exports to major trading partners and duties faced

Column heading		Description or method of calculation
Bilateral imports	in Mill US\$	Total imports of major partner countries
Diversification: 95 % trade in no. of	HS 2 digit	Number of HS Chapters with trade flows after exclusion of 5 per cent of smallest bilateral tariff line trade flows.
	HS 6 digit	Number of HS six-digit subheadings with trade flows after exclusion of 5 per cent of smallest bilateral tariff line trade flows
MFN Average of traded TL	Simple	Simple average of MFN duties based only on tariff lines with imports
	Weighted	Trade-weighted average MFN duty
Preference margin	Weighted	Trade-weighted average difference between the MFN duty and the most advantageous preferential duty. Tariff lines where either MFN or preferential duties cannot be expressed in <i>ad valorem</i> terms have been excluded.
Duty-free imports	TL in %	Duty-free tariff lines in per cent of all bilateral trade flows; includes duty-free preferential treatment. Partially duty-free subheadings are taken into account on a <i>pro rata</i> basis if tariff line imports are not available.
	Value in %	Share of duty-free trade in per cent of all bilateral trade flows; includes duty-free preferential treatment. Partially duty-free subheadings are taken into account on a <i>pro rata</i> basis if tariff line imports are not available.

## Definition of groups used in part A.2

Product Group	MTN <sup>1</sup>	Harmonized System nomenclature 2012
Agricultural products (Ag)		
Animal products	17	Ch. 01, Ch. 02, 1601-02
Dairy products	21	0401-06
Fruit, vegetables, plants	12	Ch. 07, Ch. 08, 1105-06, 2001-08
	19	0601-03, 1211, Ch. 13, Ch. 14
Coffee, tea	13	0901-03, Ch. 18 (except 1802), 2101
Cereals and preparations	x15	0407-10, 1101-04, 1107-09, Ch. 19, 2102-06, 2209
	16	Ch. 10
Oilseeds, fats & oils	18	1201-08, Ch. 15 (except 150410, 150420), 2304-06, 3823
Sugars and confectionery	14	Ch. 17
Beverages and tobacco	20	2009, 2201-08
	22	Ch. 24
Cotton	x23	5201-5203
Other agricultural products	x15	0904-10
	x23	Ch.05 (except 0508, 051191), 0604, 1209-10, 1212-14, 1802, 230110, 2302-03, 2307-09, 290543-45, 3301, 3501-05, 380910, 382460, 4101-03, 4301, 5001-03, 5101-03, 5301-02

1. Multilateral Trade Negotiations (MTN) categories were first defined in the Tokyo Round and adapted for the Harmonized System in the Uruguay Round. The product group breakdown in this publication deviates slightly from the previous definition, which was based on the HS 1992 nomenclature.

Product Group	MTN <sup>1</sup>	Harmonized System nomenclature 2012
Non-agricultural products (Non-Ag)		
Fish and fish products	11	Ch. 03, 0508, 051191, 150410, 150420, 1603-05, 230120
Minerals and metals	4	2601-17, 2620, Ch. 72-76 (except 7321-22), Ch. 78-83 (except 8304-05)
	9	Ch. 25, 2618-19, 2621, 2701-04, 2706- 08, 2711-15, Ch.31, 3403, Ch. 68-71 (except 6807, 701911-19, 701940-59), 911310-20
Petroleum	97	2709-10
Chemicals <sup>2</sup>	5	2705, Ch. 28-30 (except 290543-45, 300590), Ch. 32- 33 (except 3301, 330620) , Ch. 34 (except 3403, 3406), 3506-07, 3601-04, Ch. 37-39 (except 380910, 3823, 382460, 392112-13, 392190)
Wood, paper, etc.	1	Ch.44, 45, 47, 48, 49, 9401-04 (except 940490), 961900
Textiles	x2	300590, 330620, 392112-13, 392190, 420212, 420222, 420232, 420292, Ch. 50-60 (except 5001-03, 5101-03, 5201-03, 5301-02), Ch. 63, 640520, 640610, 6501-05, 6601, 701911-19, 701940-59, 870821, 8804, 911390, 940490, 961210
Clothing	x2	Ch. 61-62
Leather, footwear, etc.	3	Ch. 40, Ch. 41 (except 4101-4103), 4201-05 (except 420212, 420222, 420232, 420292), 4302-04, Ch. 64 (except 640520, 640610), 9605
Non-electrical machinery	7	7321-22, Ch. 84 (except 846721-29), 850860, 852841, 852851, 852861, 8608, 8709
Electrical machinery	8	846721-29, Ch. 85 (except 850860, 852841, 852851, 852861, 8519-8523 but including 852352)
Transport equipment	6	Ch. 86 (except 8608), 8701-08 (except 870821), 8711-14, 8716, 8801-03, Ch. 89
Manufactures, not elsewhere specified	10	2716, 3406, 3605-06, 4206, Ch. 46, 6506-07, 6602-03, Ch. 67, 6807, 8304-05, 8519-23 (excluding 852352), 8710, 8715, 8805, Ch. 90-93 (except 9113), 9405-06, Ch. 95-97 (except 9605, 961210 , 961900)

2. The part of HS subheading 330210 which relates to products originally classified as agricultural has not been taken into account in the Chemicals product group.

## Part A.1 Tariffs and imports: Summary and duty ranges

# 1. Non-tariff measures classification

Non-tariff measures (NTMs) are becoming more and more relevant in their influence on global trade patterns as the reductions in tariff rates over several rounds of multilateral tariff negotiations have diminished the impact of tariffs. The vast range of NTMs and their potential complexity make it sometimes very difficult to get a good overview of their existence and application. Following the brief introduction to this classification, statistical information on the incidence of three well known and well defined NTMs is presented. These three measures, anti-dumping, countervailing duties and safeguard measures are actually “tariff-like” measures, in that they act via a tariff rate or price surcharge.

## Definition of NTMs

There is no officially agreed definition of NTMs. However, a widely accepted definition is the one from the Group of Eminent Persons on Non-Tariff Barriers: “NTMs are policy measures, other than [ordinary] customs tariffs, that can potentially have an economic effect on international trade in goods, changing quantities traded, or prices or both”.<sup>1</sup>

The definition of NTMs does not judge legitimacy, adequacy, necessity or the discriminatory nature of any form of policy intervention. Furthermore, the concept of NTMs is neutral and does not imply a negative or positive

impact on trade. The existence of a NTM on a specific product in a given country per se, vis-à-vis non-existence of NTM in another country, would not mean the former has a more restrictive trade regime. It would depend on the nature, substance and application of the measure. Some NTMs might have a positive impact no trade, though many NTMs are thought to have important restrictive and/or distortionary effects on international trade regardless of whether they are applied with protectionist intent or to address important non-trade objectives. NTMs include technical requirements in the area of Sanitary and Phytosanitary (SPS) measures and Technical Barriers to Trade (TBT) that intend to protect health or safety, or provide environmental protection.

A NTM is a mandatory requirement enacted by an official law or regulation. Voluntary measures or private or voluntary standards are not included. Thus, international standards, such as ISO or Codex Alimentarius standards, are not considered a NTM unless adopted and made part of the national legislation in a country. Procedural obstacles to trade, i.e. practical challenges and processes that make compliance with the measures difficult, are also not considered as NTMs per se. Procedural obstacles are issues related to the process of application of a NTM, rather than the measure itself.

## Structure of the NTM classification

The classification intends to cover all NTMs. Measures are divided into two broad categories: import measures and export measures. Import measures reflect the requirements of the importing country on its imports. All measures imposed by the importing country, regardless of whether they are executed or verified in either the exporting or the importing country, are considered to be import measures since they relate to the importation of the product. This can include domestic regulations that apply equally to domestically produced goods if the requirement also holds for selling imported products. Export measures refer to requirements imposed by the exporting country on its own exports.

Import measures are further divided into two groups, technical measures and non-technical measures. All measures are divided into 16 chapters (see Figure 1).

The classification of the wide range of NTM policy instruments is categorized into 16 chapters which are further divided into 177 measures at the most disaggregated level. The classification allows a systematic, clear-cut and comparable categorization of policy instruments and has become a common language for most international and regional organizations as well as many national entities and researchers.

1. Non-Tariff Measures: Evidence from Selected Developing Countries and Future Research Agenda, UNCTAD/DITC/TAB/2009/3, United Nations 2010.

Figure 1. Chapter organization in the NTM classification

Import-related measures			
Technical measures	A	Sanitary and Phytosanitary (SPS) measures	Measures affecting areas such as restrictions for substances, hygienic requirements, or other measures for preventing dissemination of diseases. It also includes all conformity assessment measures related to food safety, such as certification, testing and inspection, and quarantine.
	B	Technical barriers to trade (TBT)	Measures such as labelling and other measures to protect the environment. It also includes conformity assessment that relates to technical requirements such as certification, testing and inspection.
	C	Pre-shipment inspections and other formalities	Measures related to pre-shipment inspection and other formalities performed in the exporting country prior to shipment.
Non-technical measures	D	Contingent trade-protective measures	Measures implemented to counteract particular adverse effects of imports in the market of the importing country, including measures aimed at unfair foreign trade practices; they include antidumping, countervailing, and safeguards measures.
	E	Non-automatic licensing, quotas, prohibitions and quantity-control measures	Includes licensing, quotas, and other quantity control measures; it also covers those licenses and import prohibitions which are not SPS or TBT related.
	F	Price-control measures, including additional taxes and charges	Includes price control measures, which are those implemented to control or affect the prices of imported goods in order to, inter alia, support the domestic price of certain products when the import prices of these goods are lower; establish the domestic price of certain products because of price fluctuation in domestic markets, or price instability in a foreign market; or to increase or preserve tax revenue. This category also includes measures, other than tariff measures, that increase the cost of imports in a similar manner (para-tariff measures).
	G	Finance measures	Measures restricting the payments of imports, for example when the access and cost of foreign exchange is regulated. This chapter also includes restrictions on the terms of payment.
	H	Measures affecting competition	Measures affecting competition. These measures grant exclusive or special preferences or privileges to one or more limited group of economic operators. They refer mainly to monopolistic measures, such as state trading, or sole importing agencies, or compulsory use of national services or transport.
	I	Trade-related investment measures	Measures that restrict investment by requiring local content or requesting that investment should be related to export to balance imports.
	J	Distribution restrictions	Restrictive measures related to internal distribution of imported products.
	K	Restrictions on post-sales services	Restriction on post-sales services, for example, restrictions in the provision of accessory services.
	L	Subsidies (excl. export subsidies)	Measures that relate to subsidies that affect trade.
	M	Government procurement restrictions	Government procurement restriction measures, refers to the restrictions bidders may find when trying to sell their products to a foreign Government.
	N	Intellectual property	Chapter N concerns restrictions related to intellectual property measures and intellectual property rights.[1]
	O	Rules of origin	Measures that restrict the origin of products, or their inputs.
	Export-related measures		
	P	Export-related measures	Measures a country applies to its exports. It includes export taxes, export quotas or export prohibitions.

Source: UNCTAD (2012); the full classification is available here: <http://unctad.org/en/Pages/DITC/Trade-Analysis/Non-Tariff-Measures/NTMs-Classification.aspx>

Each chapter (one digit, letters A–P) is divided into groupings using a tree/branch structure with depth of up to three additional levels (three numerical digits). Thus, it follows the same logic of

the Harmonized System classification for products. More digits indicate more disaggregation, that is, more detailed categories. Not all measures are disaggregated into the most detailed

level. Chapters K to O are not yet fully developed. The Multi-Agency Support Group MAST is currently working on the revision and further development of the International Classification of NTMs.

## 2. Statistics on some selected non-tariff measures

### 2.1. Anti-dumping

When a company exports a product at a price lower than the price it normally charges in its own home market, it is said to be “dumping” the product. The normal value is generally the price of the product at issue, in the ordinary course of trade, when destined for consumption in the exporting country market.<sup>3</sup> The WTO Agreement does not regulate the actions of companies engaged in “dumping”. Its focus is on how governments can or cannot react to dumping – it disciplines anti-dumping actions.

Data on anti-dumping (AD) measures drawn from WTO members’ notifications are available in the Integrated Trade Intelligence Portal and are the basis for the data shown here.<sup>4</sup> Some notifications lack detailed information about product classifications according to the Harmonized System (HS)

nomenclature. Missing HS coding information was complemented from the Global Antidumping Database (GAD) which is part of the World Bank’s Temporary Trade Barriers Database.<sup>5</sup> The GAD database is freely available and has detailed information about anti-dumping investigations and measures by country. The use of the data for this publication was kindly authorized by the author of the database. The merged data are available in the UNCTAD TRAINS database.<sup>6</sup>

The following tables show systematically the measure count for both the WTO member imposing the measures and the trading partner affected by the measures. It is worth noting that AD measures are also applied on exports from some countries currently acceding to the WTO and others that are not WTO members.

Table 2.1.1 gives an overview of the (stock of) measures in effect as of 31 December 2015. It indicates the product coverage in terms of HS-6 digit codes. It also lists by WTO member how many new investigations have been initiated, how many final measures have been put into effect and how many measures were withdrawn.

Tables 2.1.2 and 2.1.3 show more specifically which product groups have been subject to final AD measures.<sup>7</sup> In Table 2.1.2 the product categories follow the groupings used in this publication in Part A2 of the tariff profiles whereas in Table 2.1.3 more detailed HS 4-digit headings are used to show in detail which products are most frequently subject to final AD measures.<sup>8</sup>

2. Experience from data collection as well as policy shifts require regular review of the classification. For the further development of the chapters that are not yet sufficiently disaggregated the MAST group has established six technical working groups.

3. See also: [https://www.wto.org/english/tratop\\_e/adp\\_e/adp\\_e.htm](https://www.wto.org/english/tratop_e/adp_e/adp_e.htm).

4. See <http://i-tip.wto.org>

5. See Chad P. Bown (2015) “Global Antidumping Database”, available at <http://econ.worldbank.org/ttbd/gad/>

6. See <http://unctad.org/en/Pages/DITC/Trade-Analysis/Non-Tariff-Measures/NTMs-trains.aspx>

7. Please note that the sum of measures in Table 2.1.2 is higher than the sum of measures in Table 2.1.1. This is due to the fact that a number of individual measures cover products which fall in more than one product group. Therefore a single measure may be listed more than once in Table 2.1.2 as well as in Table 2.1.3.

8. The choice of the G-20 country grouping was made to align this report with the grouping chosen for the WTO trade monitoring reports.

## Table 2.1.1. Anti-dumping measures in effect in 2015

### Description of column headings

Country/Territory			Name of importing/exporting country/territory	
Measures taken as importer	From 1 January to 31 December 2015	Investigations initiated		Number of investigations initiated by the country as importer during the year
		Final measures	Implemented	Number of final measures implemented by the country as importer during the year
			Withdrawn / Revoked	Number of final measures withdrawn or revoked by the country as importer during the year
	As of 31 December 2015	Final measures in effect	Number of measures	Number of final measures in effect on products imported by the country end of year
			Products covered (Number of HS 6-digit)	Number of distinct HS 6-digit subheadings covered (fully or partially) by products on which final measures by the importing country were in force as of end of year
Measures faced as exporter	From 1 January to 31 December 2015	Investigations initiated		Number of investigations initiated on products exported by the country during the year
		Final measures	Implemented	Number of final measures implemented on products exported by the country during the year
			Withdrawn / Revoked	Number of final measures on products exported by the country withdrawn or revoked during the year
	As of 31 December 2015	Final measures in effect	Number of measures	Number of final measures in effect on products exported by the country as of end of the year
			Products covered (Number of HS 6-digit)	Number of distinct HS 6-digit subheadings covered (fully or partially) by products on which the country as exporter is subject to final measures as of end of the year

**Note:**

All members submitting semi-annual reports of anti-dumping actions are listed individually. Where listed members take action on a customs-union-wide basis, the figures on numbers of actions are shown for the WTO member in which the investigating authority is physically located. As indicated below, to avoid multiple-counting, the rows for the other reporting customs union members are left blank.

- All anti-dumping actions notified by the European Union operate EU-wide, i.e., in respect of all EU member states, which do not notify individually.
- All anti-dumping actions notified by South Africa operate at the level of the Southern African Customs Union, i.e., also in respect of Botswana, Lesotho, Namibia, and Swaziland.
- All actions identified in respect of the Russian Federation for 2015 and thereafter operate at the level of the Eurasian Economic Union, i.e., also in respect of Armenia, Kyrgyz Republic, Kazakhstan and Belarus (non-WTO member).

**Table 2.1.3. Anti-dumping final measures in effect as of 31 December 2015 – ranked list of the 20 most frequently affected HS headings**

Description of column headings

Product group / HS Heading description		These are product groups of the Harmonized System at the HS 4-digit heading level. They are ranked according to the number of total final measures in effect.
Total number of measures		Total number of final measures affecting products in a given HS Heading
Final measures in effect as of 31 December 2015 in the country group as importer	QUAD	Final measures of Canada, EU, Japan or the United States as importers
	G-20 (excluding QUAD)	Final measures of G-20 members excluding QUAD - as importers: Argentina, Australia, Brazil, Canada, China, India, Indonesia, Republic of Korea, Mexico, Russian Federation, Saudi Arabia, South Africa, and Turkey
	Other	Final measures of other importing countries
Final measures in effect as of 31 December 2015 against the country group as exporter	QUAD	Final measures affecting Canada, EU, Japan or the United States as exporters
	G-20 (excluding QUAD)	Final measures affecting G-20 members excluding QUAD - as exporters: Argentina, Australia, Brazil, Canada, China, India, Indonesia, Republic of Korea, Mexico, Russian Federation, Saudi Arabia, South Africa, and Turkey
	Other	Final measures affecting other exporting countries

**Table 2.1.3. Anti-dumping final measures in effect as of 31 December 2015 – ranked list of the 20 most frequently affected HS headings**

Product group/HS heading description	HS 4-digit Code	Total number of measures	Final measures in effect as of 31 December 2015 in the country group as importer			Final measures in effect as of 31 December 2015 in the country group as exporter		
			QUAD	G20 (excluding QUAD)	Other	QUAD	G20 (excluding QUAD)	Other
Flat-rolled products of iron or non-alloy steel, of a width $\geq$ 600 mm, hot-rolled, not clad, plated or coated	7208	81	27	34	20	15	42	24
Tubes, pipes and hollow profiles "e.g., open seam or welded, riveted or similarly closed", of iron or steel (excl. of cast iron, seamless tubes and pipes and tubes having internal and external circular cross-sections and an external diameter of $>$ 406,4 mm)	7306	59	48	10	1	0	34	25
Flat-rolled products of alloy steel other than stainless, of a width of $\geq$ 600 mm, hot-rolled or cold-rolled "cold-reduced"	7225	46	26	16	4	11	26	9
Tubes, pipes and hollow profiles, seamless, of iron or steel (excl. products of cast iron)	7304	44	28	15	1	10	23	11
New pneumatic tyres, of rubber	4011	42	2	39	1	1	22	19
Flat-rolled products of iron or non-alloy steel, of a width of $<$ 600 mm, hot-rolled or cold-rolled "cold-reduced", not clad, plated or coated	7211	40	16	6	18	4	22	14
Flat-rolled products of stainless steel, of a width of $\geq$ 600 mm, hot-rolled or cold-rolled "cold-reduced"	7219	39	9	20	10	10	17	12
Flat-rolled products of iron or non-alloy steel, of a width $\geq$ 600 mm, hot-rolled or cold-rolled "cold-reduced", clad, plated or coated	7210	38	15	9	14	7	23	8
Polymers of vinyl chloride or of other halogenated olefins, in primary forms	3904	35	1	33	1	13	14	8
Plates, sheets, film, foil and strip, of non-cellular plastics, not reinforced, laminated, supported or similarly combined with other materials, without backing, unworked or merely surface-worked or merely cut into squares or rectangles (excl. self-adhesive products, and floor, wall and ceiling coverings of heading 3918)	3920	35	3	20	12	2	22	11
Synthetic filament yarn, incl. synthetic monofilaments of $<$ 67 decitex (excl. sewing thread and yarn put up for retail sale)	5402	35	1	34	0	2	17	16
Flat-rolled products of stainless steel, of a width of $<$ 600 mm, hot-rolled or cold-rolled "cold-reduced"	7220	32	9	15	8	9	13	10
Flat-rolled products of alloy steel other than stainless, of a width of $<$ 600 mm, hot-rolled or cold-rolled "cold-reduced"	7226	30	26	3	1	6	18	6
Polycarboxylic acids, their anhydrides, halides, peroxides and peroxyacids; their halogenated, sulphonated, nitrated or nitrosated derivatives	2917	29	2	18	9	9	13	7
Tube or pipe fittings "e.g. couplings, elbows, sleeves", of iron or steel	7307	25	14	11	0	2	17	6
Bars and rods of iron or non-alloy steel, hot-rolled, in irregularly wound coils	7213	23	11	7	5	1	15	7
Heterocyclic compounds with nitrogen hetero-atom[s] only	2933	22	7	15	0	7	13	2
Float glass and surface ground or polished glass, in sheets, whether or not having an absorbent, reflecting or non-reflecting layer, but not otherwise worked	7005	20	1	18	1	2	12	6
Phenols; phenol-alcohols	2907	18	0	18	0	7	5	6
Flat-rolled products of iron or non-alloy steel, of a width of $<$ 600 mm, hot-rolled or cold-rolled "cold-reduced", clad, plated or coated	7212	18	14	4	0	1	12	5

## 2.2. Countervailing measures

Dumping and subsidies – together with anti-dumping (AD) measures and countervailing duties (CVD) – share a number of similarities. The reaction to dumping and subsidies is often a special offsetting import tax (countervailing duty in the case of a subsidy). This is charged on products from specific countries and therefore it breaks the GATT principles of binding a tariff and treating trading partners equally (MFN). The agreements provide an escape clause, but they both also say that before imposing a duty, the importing country must conduct a detailed investigation that shows that domestic industry is hurt. But there are also fundamental differences, and these are reflected in the agreements.

Dumping is an action by a company. With subsidies, it is the government or a government agency that acts, either by paying out subsidies directly or by requiring companies to subsidize certain customers. Countervailing duty (the parallel of anti-dumping duty) can only be charged after the importing country has conducted a detailed investigation similar to that required for anti-dumping action.<sup>9</sup> Data on countervailing (CVD) measures drawn from WTO members' notifications are available in the Integrated Trade Intelligence Portal and are the basis for the data shown here.<sup>10</sup>

Table 2.2.1 gives an overview of the (stock of) measures in effect as of 31 December 2015. It indicates the

product coverage in terms of HS-6 digit codes. It also lists by country how many new investigations have been initiated, how many final measures have been put into effect and how many measures were withdrawn.

Tables 2.2.2 and 2.2.3 show more specifically which product groups have been subject to final CVD measures.<sup>11</sup> In Table 2.2.2 the product categories follow the groupings used in this publication in Part A.2 of the tariff profiles whereas in Table 2.2.3 more detailed HS 4-digit headings are used to show in detail which products are most frequently subject to final CVD measures.<sup>12</sup>

9. [https://www.wto.org/english/tratop\\_e/scm\\_e/scm\\_e.htm](https://www.wto.org/english/tratop_e/scm_e/scm_e.htm)

10. See <http://i-tip.wto.org>

11. Please note that the sum of measures in Table 2.2.2 is higher than the sum of measures in Table 2.2.1. This is due to the fact that a number of individual measures cover products which fall in more than one product group. Therefore a single measure may be listed more than once in Table 2.2.2 as well as in Table 2.2.3.

12. The choice of the G-20 country grouping was made to align this report with the grouping chosen for the WTO trade monitoring reports.

## Table 2.2.1. Countervailing measures in effect in 2015

### Description of column headings

Country/Territory			Name of importing/exporting country/territory	
Measures taken as importer	From 1 January to 31 December 2015	Investigations initiated	Number of investigations initiated by the country as importer during the year	
		Final measures	Implemented	Number of final measures implemented by the country as importer during the year
			Withdrawn / Revoked	Number of final measures withdrawn or revoked by the country as importer during the year
	As of 31 December 2015	Final measures in effect	Number of measures	Number of final measures in effect on products imported by the country end of year
			Products covered (Number of HS 6-digit)	Number of distinct HS 6-digit subheadings covered (fully or partially) by products on which final measures by the importing country were in force as of end of year
Measures faced as exporter	From 1 January to 31 December 2015	Investigations initiated	Number of investigations initiated on products exported by the country during the year	
		Final measures	Implemented	Number of final measures implemented on products exported by the country during the year
			Withdrawn / Revoked	Number of final measures on products exported by the country withdrawn or revoked during the year
	As of 31 December 2015	Final measures in effect	Number of measures	Number of final measures in effect on products exported by the country as of end of the year
			Products covered (Number of HS 6-digit)	Number of distinct HS 6-digit subheadings covered (fully or partially) by products on which the country as exporter is subject to final measures as of end of the year

			QUAD	G20 (excluding QUAD)	Other	QUAD	G20 (excluding QUAD)	Other
Tubes, pipes and hollow profiles, of iron or steel (excl. of cast iron, seamless tubes and pipes and tubes having internal and external circular cross-sections and an external diameter of > 406,4 mm)	7306	12	11	1		12		
Tubes, pipes and hollow profiles, seamless, of iron or steel (excl. products of cast iron)	7304	7	7			7		
Flat-rolled products of iron or non-alloy steel, of a width >= 600 mm, hot-rolled or cold-rolled "cold-reduced", clad, plated or coated	7210	7	5	2		6	1	
Flat-rolled products of alloy steel other than stainless, of a width of >= 600 mm, hot-rolled or cold-rolled "cold-reduced"	7225	6	5	1		5	1	
Flat-rolled products of iron or non-alloy steel, of a width >= 600 mm, hot-rolled, not clad, plated or coated	7208	6	5	1		5	1	
Flat-rolled products of alloy steel other than stainless, of a width of < 600 mm, hot-rolled or cold-rolled "cold-reduced"	7226	5	5			4	1	
Flat-rolled products of iron or non-alloy steel, of a width of < 600 mm, hot-rolled or cold-rolled "cold-reduced", not clad, plated or coated	7211	5	5			4	1	
Prepared binders for foundry moulds or cores; chemical products and preparations for the chemical or allied industries, incl. mixtures of natural products, n.e.s.	3824	5	3	1	1	4	1	
Diodes, transistors and similar semiconductor devices; photosensitive semiconductor devices, incl. photovoltaic cells whether or not assembled in modules or made up into panels (excl. photovoltaic generators); light emitting diodes; mounted piezoelectric crystals; parts thereof	8541	4	4			4		
Structures and parts of structures, of iron or steel; plates, rods, angles, shapes, sections, tubes and the like, prepared for use in structures, of iron or steel (excl. prefabricated buildings of heading 9406)	7308	4	4			4		
Tubes and pipes, having circular cross-sections and an external diameter of > 406,4 mm, of flat-rolled products of iron or steel	7305	4	4			4		
Paper and paperboard, coated on one or both sides with kaolin "China clay" or other inorganic substances, with or without a binder, and with no other coating, whether or not surface-coloured, surface-decorated or printed, in rolls or in square or rectangular sheets, of any size (excl. all other coated papers and paperboards)	4810	4	4			4		
Hydrogen, rare gases and other non-metals	2804	4	1	3		2	2	

## 2.3. Safeguards

A WTO member may restrict imports of a product temporarily (take “safeguard” actions) if its domestic industry is injured or threatened with injury caused by a surge in imports. Here, the injury has to be serious. An import “surge” justifying safeguard action can be a real increase in imports (an absolute increase); or it can be an increase in the imports’ share of a shrinking market, even if the import quantity has not increased (relative increase). Industries or companies may request safeguard action by their government. After a proper investigation, a government can, if the necessary conditions as above are met, restrict imports of the product from all sources (but not from a specific member or group of members). This means that, for example, if there

were 5 countries exporting a specific product into a country, and that country imposed a safeguard measure on this product, this safeguard measure affects five countries. In this sense, care should be taken when comparing the number of measures in, for example anti-dumping, where one anti-dumping measure affects only one exporting country. The WTO agreement sets out requirements for safeguard investigations by national authorities. The emphasis is on transparency and on following established rules and practices – avoiding arbitrary methods.<sup>13</sup> Data on safeguard actions drawn from WTO members’ notifications are available in the Integrated Trade Intelligence Portal and are the basis for the data shown here.<sup>14</sup>

Table 2.3.1 gives an overview of the (stock of) measures in effect as of 31 December 2015. It indicates the product coverage in terms of HS-6 digit codes. It also lists by country how many new investigations have been initiated and how many final measures have been put into effect.

Tables 2.3.2 and 2.3.3 show more specifically which product groups have been subject to final Safeguard measures.<sup>15</sup> In table 2.3.2 the product categories follow the groupings used in this publication in Part A.2 of the tariff profiles whereas in table 2.3.3 more detailed HS chapters are used to show in detail which particular products are most frequently subject to final safeguard measures.<sup>16</sup>

**Table 2.3.1. Safeguard measures in effect in 2015**

### Description of column headings

Country/Territory		Name of country/territory	
From 1 January to 31 December 2015	Investigations initiated	Number of investigations initiated by the country during the year	
	Final measures Imposed	Number of final measures imposed by the country during the year	
As of 31 December 2015	Final measures in effect	Number of measures	Number of final measures in effect on products imported by the country as of end of the year
		Products covered (Number of HS 6-digit)	Number of distinct HS 6-digit subheadings covered (fully or partially) by products on which final measures by the importing country were in force as of end of the year

13. See also [http://www.wto.org/english/thewto\\_e/whatis\\_e/tif\\_e/agrm8\\_e.htm#safeguards](http://www.wto.org/english/thewto_e/whatis_e/tif_e/agrm8_e.htm#safeguards)

14. See <http://i-tip.wto.org>

15. Please note that the sum of measures in Table 2.3.2 is higher than the sum of measures in Table 2.3.1. This is due to the fact that a number of individual measures cover products which fall in more than one product group. Therefore a single measure may be listed more than once in Table 2.3.2 as well as in Table 2.3.3.

16. The choice of the G-20 country grouping was made to align this report with the grouping chosen for the WTO trade monitoring reports.

# IV. Special topic

---

# 2017 version of the Harmonized System

On 1 January 2017, customs administrations around the world will shift to the 2017 version of the Harmonized Commodity Description and Coding System (HS). Amendments in HS 2017 will affect the classifications of around 15 per cent of goods traded in the world.

This new version includes 233<sup>1</sup> sets of amendments to the 2012 version of the HS. Approximately a third of these amendments are “typological changes”<sup>2</sup> clarifying terms used in product descriptions and chapter notes, while the rest are “structural changes”, involving modifications to the product scopes of headings or subheadings.

As with the previous HS amendments, the majority of changes in HS 2017 have been introduced to address environmental and social issues.

The largest set of changes was proposed by the Food and Agricultural Organization (FAO) of the United Nations. These involve fishery, fertilizers, agricultural machinery and forestry products. For example, the classifications of species and product forms for fish and fishery products have been further subdivided to enhance the monitoring of trade in these products for food security purposes. Crustaceans, molluscs and

other invertebrates have been split into more detailed product classifications due to the importance of trade in these products and consumption of these species. Forestry products have been classified into a wider range of wood species (tropical, temperate), with a distinction between coniferous and non coniferous species.

The second largest set of amendments relate to environmental and social concerns. The amendments have resulted in more detailed classifications for certain chemical products, such as chemical weapons, persistent organic pollutants, hazardous chemicals, pesticides and narcotics to address the need for monitoring trade in these products, as required by international conventions (see Annex A).

Apart from addressing environmental and social concerns, HS 2017 has also introduced new product classifications to reflect changes in manufacturing processes and technological advances. Subheadings have been modified to accommodate products such as light-emitting diode (LED) lamps, multi-component integrated circuits (MCOs), and hybrid, plug-in hybrid and all-electric vehicles. The evolution of industry practices has been captured through changes that include modification of the size criteria for

newsprint (heading 4801), eliminating the distinction between glazed and unglazed ceramics (heading 6907) and redrafting subheadings for certain types of machine tools (heading 8460) in the light of current technology.

To reflect the changing pattern in trade, the 2017 modifications include several new subheadings. Chapter 44 (wood), for example, has been subdivided to capture the increased volume of international trade in these products.

HS 2017 contains a total of 5,386 subheadings; the largest number since the HS was introduced in 1988 (see Table 1). Compared with the 2012 version, 263 new subheadings have been created and the product coverage of 211 subheadings has been changed. Relatively few subheadings have been deleted. About a third of the affected subheadings relate to chapter 3 (fish), 15 per cent to chapter 29 (organic chemicals) and around 8 per cent to chapter 44 (wood) and chapter 84 (machinery and mechanical appliances). The 2017 amendments will affect the classifications of around 15 per cent of goods traded in the world. This is significantly more than the 2012 modifications but below the changes due to the 2007 version.

**Table 1: Overview of changes in versions of the Harmonized System**

	HS 2017	HS 2012	HS 2007	HS 2002	HS 1996
Total number of subheadings	5,386	5,205	5,052	5,224	5,113
Number of subheadings created	263	329	260	338	348
Number of subheadings with changes in product scope <sup>a</sup>	211	130	335	173	145
Deleted subheadings	82	176	432	227	255
Percentage of world imports <sup>3</sup> affected by change in HS version	14.5	9.3	19.7	12.5	16.0
Number of pairs of correlation from one version to the other	667	617	1191	833	801

a: 6-digit code exists in both versions of the HS, i.e. code is reused with different product coverage (expanded or reduced).

- Complementary amendments to the HS Nomenclature 2017 Edition were accepted at a later stage to make further corrections and amendments to headings 03.02, 03.03, subheading 6304.20 and to chapter 44. These would enter into force on 1 January 2018, although HS contracting parties are encouraged to apply those amendments already in 2017.
- Typological changes aimed at correcting typos or clarifying text to ensure uniform application of the HS. In some cases, the typological change can apply only to the English or French version. For more details, see Yu, Dayong: “*The Harmonized System – amendments and their impact on WTO Members’ schedules*”, WTO, 2008.

Alongside the HS 2017 amendments, the Secretariat of the World Customs Organization has published correlation tables between HS 2012 and HS 2017.<sup>4</sup> These tables constitute very important guidelines for implementing the amendments to the HS. The tables are not to be regarded as classification decisions nor as having

any legal status but they were examined by the HS Committee. The tables display the structural amendments through 667 pairs of correlations between HS 2017 and HS 2012 subheadings (see Table 2). Not surprisingly, a large number of these correlations concern fish and fish products. In particular, over 80

pairs of correlation cover the new subheadings 0302.99 and 0303.99, which were expanded to cover fish fins, heads, tails, maws and other edible fish offal. A total of 80 pairs of correlation have been listed to reflect the transfer of fish offal. In total, about 160 pairs of correlation related to amendments to 0302.99 and 0303.99.

**Table 2: HS 2017, number of affected subheadings and pairs of correlation (sorted by number of affected subheadings and HS chapter)**

Chapter	Number of		Chapter	Number of	
	Affected subheadings in HS 2017	Pairs of correlations		Affected subheadings in HS 2017	Pairs of correlations
03	154	247	54	4	4
29	71	73	55	4	4
44	51	57	08	3	3
84	35	50	40	3	8
87	25	40	48	3	5
38	19	24	13	2	2
30	18	18	31	2	2
85	14	21	57	2	2
28	12	13	63	2	2
39	7	7	14	1	1
90	6	7	20	1	1
94	6	6	37	1	2
12	5	11	68	1	1
60	5	8	73	1	1
69	5	20	76	1	1
16	4	5	92	1	1
22	4	4	96	1	16

Another significant change in HS 2017 is the creation of a subheading for "monopods, bipods, tripods and similar articles thereof", transferring these products under subheading 9620.00 to ensure uniform application of the nomenclature. This transfer is quite complex as it concerns 16 pairs of correlation and involves a large and

diverse number of chapters: chapter 39 (plastics), 44 (wood), 68 (stone, including graphite and carbon fibres), 72 (iron and steel), 76 (aluminium), 84 (machinery and mechanical appliances), 85 (electrical machinery), 90 (optical, photographic, cinematographic, measuring instruments, etc.) and 92 (musical instruments). It is also

striking that 15 of the 16 HS 2012 subheadings are typical "residual" subheadings, with product descriptions such as "other", "parts and accessories" or "not-elsewhere specified". The scope of these subheadings depends on the preceding subheadings in these chapters. Hence, it is not straightforward.

3. Percentage of world imports classified under subheadings affected by change in version of HS on the year before the HS amendments take place, except for HS 2017. E.g. for HS1996, the share of world imports relate to HS 1992 subheadings affected by changes to HS 1996 for 1995 world imports. For HS 2017, 2015 world imports were used.  
4. The WCO refers to these correlation tables as interconnection tables.

In addition, the correlations of five subheadings are not clearly defined in the HS 2012, HS 2017 correlation tables (see Table 3). Alkaloids of non-vegetal origin (2939.80) could originate, for example, from a number

of the 27 subheadings under headings 29.33 and 29.34. Also, 8542.31 in HS 2017 has the same coverage as HS 2012 plus the inclusion of MCOs which were classified under several of the 965 subheadings of chapters

84, 85, 90, 93 and 95 in HS 2012. Lack of clearly defined correlations for these changes could be an issue for users that need to construct time series on trade data or reflect tariff commitments in the new nomenclature.<sup>5</sup>

**Table 3: Correlations which are not clearly defined**

2017 Version	2012 Version	Remarks
2939.71	2939.91	Expansion of the scope of heading 29.39 to include other alkaloids obtained, for example, from animal origin.
2939.79	2939.99	
2939.80	Applicable subheadings, such as subheadings of headings 29.33 and 29.34	At the same time, subheadings 2939.91 and 2939.92 have been renumbered for the creation of a new subheading 2939.80 for «Other». The new subheading 2939.80 covers all the alkaloids of non-vegetal origin.  Expansion of the scope of heading 29.39 entails the transfer of certain products currently covered by other headings of the nomenclature (for example, heading 29.33, heading 29.34) to the new subheading 2939.80.
8542.31	8542.31	Expansion of the scope of heading 85.42 to include multi-component integrated circuits (MCOs). These MCOs have been defined in new Note 9 (b) (iv) to Chapter 85.  Expansion of the scope of heading 85.42 entails the possible transfer of certain products currently covered by other headings of the nomenclature (in particular, but not limited to, headings 84.22, 84.31, 84.43, 84.50, 84.66, 84.73, 84.76, 85.04, 85.17, 85.18, 85.22, 85.29, 85.30, 85.31, 85.35, 85.36, 85.37, 85.38, 85.43, 85.48, 90.25, 90.26, 90.30, 90.31, 90.32, 90.33, 93.05, 93.06 and 95.04) to subheading
	Applicable subheadings, in particular in Chapters 84, 85, 90, 93 and 95	
8542.32	8542.32	
	Applicable subheadings, in particular in Chapters 84, 85, 90, 93 and 95	
8542.33	8542.33	
	Applicable subheadings, in particular in Chapter 85	
8542.39	8542.39	
	Applicable subheadings, in particular in Chapters 84, 85, 90, 93 and 95	

As in previous rounds of Harmonized System amendments, the introduction of HS 2017 will trigger a challenging process for WTO members. Apart from using the new tariff nomenclature for applied tariff regimes, a similar process will take place at the WTO because WTO members have to transpose their

tariff commitments on goods to the latest nomenclature. For the technical part of this process, WTO members can count on the assistance of the WTO Secretariat. The Secretariat team has gained substantial experience in assisting WTO members in updating their tariff concessions and verifying

other members' transposed lists. A well-established automatic procedure has been set up to deal with the large number of schedules to be processed and to minimize the number of tariff lines that have to be handled manually.<sup>7</sup>

5. In former changes to versions of the HS, whenever consensus could not be reached, the HS Committee would still list a correlation table (e.g. 4101.20 for HS 2012 or for some HS 2007 changes due to technological progress in the high technology sector) and indicate that there was no consensus on those correlations.

6. To facilitate the forthcoming HS 2017 change, the WTO Secretariat will issue a paper to summarize the technical details, with specific suggestions on HS 2017.

7. If an HS 2017 new or reused subheading is linked to HS 2012 national tariff lines (more detailed than six digits) with different levels of commitments, product descriptions in both versions of the HS have to be compared to examine which national tariff lines should be retained and whether "break-outs" in HS 2017 have to be created to reflect different levels of commitments. This process cannot be done automatically and requires manual intervention.

## Annex A

The second largest set of amendments in HS 2017 relate to chemicals, following requests from several organizations.

- The Organization for the Prohibition of Chemical Weapons requested that the 33 most traded scheduled chemicals (i.e. chemicals which can either be used as chemical weapons or used in the manufacturing of chemical weapons and which have no, or very limited, uses outside of chemical warfare) be included in HS 2017.
- The Secretariat (United Nations Environment Programme) for the Stockholm Convention on Persistent Organic Pollutants requested the identification of some persistent organic pollutants (i.e. toxic organic compounds that resist degradation and accumulate in the food chain; they can be transported over long distances in the atmosphere, resulting in widespread distribution across the earth).
- The United Nations International Narcotics Control Board (INCB) requested a better monitoring of raw ephedrine, pseudoephedrine and norephedrine since there has been an increase in pharmaceutical products containing these substances.
- The Rotterdam Convention Secretariat proposed new HS codes for several compounds that were added to Annex III.

International conventions	HS 2017 subheadings added
Organization for the Prohibition of Chemical Weapons	2811.12, 2812.11, 2812.12, 2812.13, 2812.14, 2812.15, 2812.16, 2812.17, 2853.10, 2904.91, 2918.17, 2920.21, 2920.22, 2920.23, 2920.24, 2920.29, 2921.12, 2921.13, 2921.14, 2922.15, 2922.16, 2922.17, 2922.18, 2930.60, 2930.70, 2931.31, 2931.32, 2931.33, 2931.34, 2931.35, 2931.36, 2931.37, 2931.38, 2931.39, 3824.91
Stockholm Convention on Persistent Organic Pollutants (POPs)	2903.83, 2903.93, 2903.94, 2904.31, 2904.32, 2904.33, 2904.34, 2904.35, 2904.36, 2910.50, 2914.71, 2920.30, 3824.84, 3824.85, 3824.86, 3824.87, 3824.88
UN International Narcotics Control Board	1211.50, 1302.14, 1302.19, 3003.41, 3003.42, 3003.43, 3004.41, 3004.42, 3004.43
Rotterdam Convention	2904.31, 2904.32, 2904.33, 2904.34, 2904.35, 2904.36, 2920.30, 2923.30, 2923.40, 2924.25, 2930.80, 2933.92, 2935.10, 2935.20, 2935.30, 2935.40, 2935.50, 3808.52, 3824.84, 3824.85, 3824.86, 3824.87, 3824.88

# V. Annexes

<b>A. Data sources</b>	<b>220</b>
<b>B. Frequently asked questions</b>	<b>225</b>

---

## A. Data sources

The data was pooled from the three organizations' respective databases, i.e. WTO's Consolidated Tariff Schedules database (CTS) and Integrated Data Base (IDB), ITC's MAcMap and TradeMap databases and UNCTAD's TRAINS database. The objective was to use for each country or customs territory the latest available information. For the summary tables and Part A of the tariff profiles, only applied tariffs for the years 2015 or 2014 and imports for 2014 or 2013 were retained. The cut-off date for inclusion of new data in the publication was 31 June 2016.

For Part B in the tariff profiles all notified trade agreements with available data were included in the calculation of the preference margin and duty-free access. Some trade agreements that are currently in force have not been included for one or more of the following reasons: (1) the agreement – or the supplementary information to it – was not accessible (or the document was unworkable) at the time of the publication; (2) the data presented some problems such as: missing product codes, the products codes of the agreement did not correspond to

the product codes of the MFN tariffs of the country; or (3) the agreement entered into force after the country was uploaded in the Market Access Map database (in such cases the agreements will be included in the subsequent update of the database).

For more detailed information on the full contents of each of the respective databases, the reader is referred to the respective websites and/or documents:

2. For some countries, the data for a country period shown in the table could not be used because the data was incomplete, inconsistent and in the case of trade statistics, without corresponding tariff data.

## B. Frequently asked questions

---

### How do you choose the countries to include in the publication?

In each issue, we include all WTO members and some countries or territories for which there is available data for applied tariffs for the reference years. Non-WTO members included in the publication can vary from issue to issue depending on the availability of data on applied tariffs for the reference years. WTO members are always included.

### Why is there no applied MFN tariff for some WTO members?

Unlike data on bound tariffs which are sourced from legal documents at the WTO, applied tariffs are based on notification of the member to the WTO or from the tariff database of either the ITC or UNCTAD, the two other institutions collaborating with the WTO on this publication. For each issue of the WTP, we use two reference years for the applied MFN tariff, usually the most recent two years. For example, in the WTP 2016 issue, the data on applied tariffs used are for 2015 and if these are not available, we use 2014. If neither of those years is available from any of the tariff database of the three institutions, the statistics referring to applied tariffs are left blank.

### Why is there no statistic on binding coverage for AG products?

During the Uruguay Round of tariff negotiations all members were supposed to have bound all their tariff lines for agricultural products, hence binding coverage for AG is assumed to be 100%.

### How do you calculate the tariff average when there are non-*ad valorem* tariffs?

Whenever there is a non-*ad valorem* duty in a certain country schedule, it is converted to its *ad valorem* equivalent (AVE) to the extent possible. For the methodology used in calculating the AVE, please refer to Technical Annex B of World Tariff Profiles 2006. As a caveat though, some non-*ad valorem* duties are too complex and the calculation of the AVE requires additional data not readily available (e.g. duty expressed as “9 + EA max 18.7 + AD S/Z”). In such cases, the duty is not included in the calculation of the tariff indicators.

### Why is the applied tariff average higher than the bound tariff average? (Related to this is the case when the maximum applied tariff is higher than the maximum bound tariff.)

When the bound tariff is lower than the applied tariff, it implies a binding violation. However, this is not always true. The following cases show why even if the calculated applied statistics are higher than the corresponding bound statistics, it is possible that there was no binding violation.

- The binding coverage might be less than 100% and the applied duties for unbound products may be high thus affecting the average and the maximum duty. Please note that the bound tariff average is based only on tariff lines that are bound. The applied duty average is based on the full tariff schedule following a certain Harmonized System (HS) nomenclature version. Some WTO members who acceded during the Uruguay Round had not fully bound their entire tariff schedule.
- The WTO member has only recently acceded and the concessions are still not fully implemented. As the bound duty statistics presented in the WTP refer to the final bound duty at the end of the implementation period, the applied duties could still be higher than the bound duties.
- The bound and applied tariff schedules are in different HS versions. For each WTO member, the publication uses the approved or certified bound tariff data in the most recent HS version. For example, a member who joined during the Uruguay Round has its original bound tariff schedule in HS 1992. On the other hand, applied tariff is in the HS version used by the member which in practice is usually the most current version of the HS (say, HS 2012). In order for the bound tariff information to be more aligned with the applied tariffs, the schedule of concessions is regularly transposed or adapted to newer HS versions. However, all the other members have to agree to the new schedule in a different HS version to ensure that no change in the concessions happened during the transposition. This process of certifying a schedule in a more recent HS version often takes a long time. Hence, it is more often the case that the bound tariff schedule is in an older version of the HS compared to the one used for the applied tariff. The difference in HS versions is not expected to have changed any of the member's commitments but might have affected the aggregate statistics due to the differences in HS subheading breakdown between versions.
- The national tariff line breakdown might be different between the bound and applied tariff schedules even within the same HS version, which could have affected the calculated averages. In the simple example below, the applied tariff schedule was more detailed than that for bound tariff thus having an average higher than the bound tariff even if there's no binding violation.

## Bound and applied Tariffs for HS 2012 subheading 0810.90

(Guavas, mangoes and mangosteens, fresh or dried)

Bound Tariff			Applied Tariff		
Code	Description	Duty (%)	Code	Description	Duty (%)
0810.90.10	Mangoes	10	0810.90.11	Mangoes, fresh	10
			0810.90.19	Mangoes, dried	9
0810.90.90	Guavas and mangosteens	5	0810.90.90	Guavas and mangosteens	5
	<b>Average</b>	<b>7.5</b>		<b>Average</b>	<b>8</b>

- The *ad valorem* equivalents (AVE) may affect the comparison between bound and applied duties when the changes in nomenclature have resulted in the use of different unit values. Please refer to Technical Annex B of World Tariff Profiles 2006 for the methodology on the AVE calculation.
- For some WTO members who have commitments on Other Duties and Charges (ODCs), the data available on applied tariffs may include the ODCs, and it is not possible to separate the ODC from the import duty.

### Why is my calculation for simple tariff average of a country different from the one in the World Tariff Profiles?

- If there are non-*ad valorem* duties, the calculation of AVEs for the WTP might be different from the calculated AVEs from other sources.
- The WTP uses two-stage averaging. First, the average of all national tariff lines within the same HS six-digit subheading is calculated and then the mean of all HS subheading averages is taken. This is to minimize the variability caused by the different national tariff line breakdowns within the subheading. All reporters using the same HS version would have the same number of subheading (i.e., second stage) averages from which the country average or sectorial or product group average is calculated.

### My country did not change its applied tariff rates from that of the previous year but why did the average change?

- If there are non-*ad valorem* duties, the calculated AVEs could have changed because new reference years for imports are used every issue.
- Even without non-*ad valorem* duties in a tariff schedule, it's possible that the breakdown changed for some reasons but the applied tariff rate for each product remained the same. Please see the example below on the average for HS subheading 0810.90 which changed because of the difference in the breakdown of tariff lines.

Year 1 Applied Tariff			Year 2 Applied Tariff		
Code	Description	Duty (%)	Code	Description	Duty (%)
0810.90.10	Mangoes	10	0810.90.11	Mangoes, fresh	10
			0810.90.19	Mangoes, dried	10
0810.90.90	Guavas and mangosteens	5	0810.90.90	Guavas and mangosteens	5
	<b>Average</b>	<b>7.5</b>		<b>Average</b>	<b>8.3</b>

### Why are there maximum values that are italicized?

To differentiate between a maximum based on an *ad valorem* tariff and one based on an AVE, the value of which can vary depending on the unit value of the product for the reference period, the maximum value based on an AVE is italicized.

### Why does the same year for applied tariff appear for two consecutive WTP issues?

For each issue of the WTP, we use two reference years for the applied MFN tariff, usually the most recent two years and select the latest year available. There is always a one-year overlap on the reference years for consecutive issues of the WTP. For example, for WTP 2015, the reference years for tariff are 2014 and 2013 and for WTP 2016, they are 2015 and 2014. If, during the preparation

for WTP 2015, the 2014 data for Country X is already available, then 2014 data is used. However, if for WTP 2016 Country X has no available data yet for 2015 in any of the databases, the data for 2014 is re-used.

## Why does the same year for applied tariff appear for two consecutive WTP issues but with different statistics?

The answer to why the same year appears for two consecutive WTP issues is in the **previous question**.

The reason why the statistics differ could be the presence of non-*ad valorem* duties in the tariff schedule. Different reference years on imports are used for the calculation of AVEs for each issue and hence the AVEs can change.

Another reason could be that the reporter itself revised the data previously submitted for the relevant year.

## Why did the bound tariff statistics differ from the WTP issue of the previous year?

In theory, bound tariffs do not change unless there is a renegotiation of a Member's commitments. Hence, the most intuitive answer would be that the Member renegotiated some or even all of its commitments during the course of the year.

However, there could be other reasons why, even if there were no changes in the commitments, some aggregate statistics changed. One of these could be the presence of non-*ad valorem* duties in the bound tariff schedule. Different reference years on imports are used for the calculation of AVEs for each issue and hence the AVEs can change.

Another reason could be the use of an approved schedule in a more recent HS version. Please refer to the question "why is the applied tariff average higher than the bound tariff average?" for additional explanation.

## My country imports mostly from partners with whom we have a free trade agreement and imports come in duty free. Why is the calculated trade weighted average much higher than what is expected?

The trade weighted average presented in Part A.1 of each tariff page is based on applied MFN duty weighted by total imports and does not take into consideration non-MFN duties (mostly preferential) applied to certain trading partners. In effect, this is the trade weighted average assuming all imports are levied the MFN rate.

## In Part B, the statistics show that exports from my country to a certain partner (i.e. imports of the partner from my country) do not enjoy preference as reflected by the preferential margin and % duty free imports. However, in reality our exports enjoy preferential rates in this market. Why don't the statistics show this?

The market access statistics calculated in Part B require complete information on non-MFN tariff regimes which each market or importer applies to each of its import partners. However, there are non-MFN or other preferential tariff regimes which are not officially notified to the WTO nor are these available in the other tariff databases. The statistics are based only on non-MFN tariff regimes for each market for which we have data.

## How can I get the EXCEL version of the tariff profiles and summary tables for previous WTP issues?

At present there is no online facility yet to extract these tables. However, these can be requested from the Market Access Intelligence Section of the WTO. Send your email request to [mai@wto.org](mailto:mai@wto.org) specifying which data years or WTP issues you are interested in.

# Acknowledgements

---

Acknowledgements are due to all the data providers, mostly national administrations or WTO delegations who have made this information available including through notifications presented as a special topic. In a number of cases, data has been made available on national websites or through regional organizations. Given the vast amount of statistical data and metadata that needed to be processed, and because this information is not available in one single organization, this publication was only possible as a joint effort of the WTO, ITC, and UNCTAD. Each of the three organizations has a proven track record and comparative strengths in the field of tariff analysis.

The WTO, as the repository of its members' binding commitments on goods and also as repository for members' notifications in a number of trade policy areas, has been at the core of this undertaking. Trade and tariff data were sourced from either the WTO or ITC databases depending on which one

had the most recent tariff or trade data for the years covered. In addition, the ITC contributed all the AVE estimates and preferential duties. Missing trade data for some countries were also sourced from the UN Commodity Trade Statistics Database (COMTRADE).

The preparation of this publication was coordinated by Jürgen Richtering (WTO) in close collaboration with Mondher Mimouni (ITC) and Ralf Peters (UNCTAD) under the overall supervision of Hubert Escaith, WTO's Chief Statistician. Adelina Mendoza (WTO) was responsible for calculating the tariff indicators presented and preparing the final layout of the publication. Xavier Pichot (ITC) was in charge of providing the input dataset and of calculating the AVEs. At the ITC, thanks are also due to the data collection team coordinated by Laetitia Rinderknecht as well as to Dzmitry Kniahin for data processing. Eric Ng Shing (WTO) wrote the technical paper for this edition's special topic. Ralf Peters (UNCTAD) wrote the article on

the non-tariff measures classification. Carole Boureux (WTO) assisted in the formatting of these articles. Fabien Dumesnil (UNCTAD), Dayong Yu (WTO) and Jürgen Richtering (WTO) prepared the statistical tables on anti-dumping measures, countervailing duties and safeguard actions. They would like to thank Chad P. Bown (World Bank) for allowing the use of GAD anti-dumping data. Thanks are also due to Staff of the WTO Rules Division for their comments and suggestions for the technical annexes.

Finally, the contributions of the WTO Information and External Relations Division, specifically Mr. Serge Marin-Pache, and WTO printing facilities for the production and the French and Spanish translators in the Language Services and Documentation Division for rendering the publication in the WTO's other official languages are also hereby acknowledged.

If you would like more information on the contents of this report or if you have any comments or suggestions for improvement please contact the Market Access Intelligence Section ([mai@wto.org](mailto:mai@wto.org)).

*World Tariff Profiles 2016* provides comprehensive information on the tariffs and non-tariff measures imposed by over 170 countries and customs territories. The publication starts with a breakdown of the tariffs imposed by these economies. The data is presented in summary tables and in individual one-page profiles for each economy. This is followed by a new section on the use of non-tariff measures, which are becoming increasingly important in international trade. The special topic for this edition is the 2017 version of the Harmonized System for classifying goods, which will enter into force on 1 January 2017.

The publication is jointly prepared by the World Trade Organization, the United Nations Conference on Trade and Development (UNCTAD) and the International Trade Centre (ITC).
