The International Trade Centre’s Netherlands Trust Fund V (NTF V) is a four-year partnership (July 2021- June 2025) signed by the Ministry of Foreign Affairs of The Netherlands and the International Trade Centre to support micro, small and medium-sized Enterprises (MSMEs) in the digital technologies and agribusiness sectors.

The programme includes both sectors in Ethiopia, Ghana, Senegal, and the digital technologies sector in a multi-country project in Benin, Cote d'Ivoire, Mali and Uganda. As with previous NTF programmes, NTF V will be jointly implemented with the Dutch Centre for the promotion of exports from developing countries (CBI).

The NTF V tech projects aim at strengthening tech startups and IT & BPO MSMEs, applying ITC’s FastTrackTech methodology. They also seek to influence policy makers and regulators, Trade and Investment Support Institutions and private business support providers, as well as international private sector partners in creating a supportive environment for enterprises in the IT and IT Enabled Services sector.

In the digital technology sector, our trade-related technical support is three-fold:

1. **At the policy level:**
   - we provide assistance in the development or improvement of public policies and sectoral regulations, with private-sector representatives

2. **At institutional level:**
   - we provide assistance in the development or improvement of public policies and sectoral regulations, with private-sector representatives

3. **At the start-up & MSME level:**
   - we provide assistance in the development or improvement of public policies and sectoral regulations, with private-sector representatives

The Ministry of Foreign Affairs of the Netherlands
- Sustainable Economic Development Department

The Ministry of Foreign Affairs of the Netherlands (MFA) promotes sustainable and inclusive economic growth in developing countries by helping to improve the business climate and stimulating enterprise. It also enhances sustainable trade with developing countries and supports the construction of good roads, ports and power supply systems. Trade unions, employers’ organisations and farmers’ cooperatives in developing countries receive support to improve the services they provide to their members. MFA helps local authorities collect taxes effectively and transparently. It also provides finance for businesses in developing countries and supports Dutch companies that produce innovative solutions to local challenges.
