

World Tariff Profiles 2021

SPECIAL TOPIC
Non-tariff measures:
Estimating analytical
indicators using
UNCTAD's Trade Analysis
Information System
(TRAINS)

About this publication

World Tariff Profiles is a co-publication of the WTO, ITC and UNCTAD on market access for goods. This annual publication provides comprehensive information on the tariffs and non-tariff measures imposed by over 170 countries and customs territories. Non-WTO members are included if data on the tariffs they applied in 2020 or 2019 are available in the databases of the WTO, ITC or UNCTAD.

For more information

The statistical tables included in this report can be downloaded from the WTO web site at www.wto.org/statistics

General note and abbreviations

Abbreviations

AVG	Average
AG	Agricultural products
AVE	<i>Ad valorem</i> equivalent
HS	Harmonized System (nomenclature)
Max	Maximum duty
MFN	Most favoured nation
NAV	Non- <i>ad valorem</i> duty
Non-AG	Nonagricultural products
SSG	Special safeguards
TL	Tariff line
UV	Unit value

Notations

–	Not applicable
0	= 0 (not rounded)
0.0	> 0 and < 0.05
100	= 100 (not rounded)
100.0	> 99.95 and < 100
Blank	Bound or applied duties and/or imports are not available at all for a given country or territory.
<i>Italics</i>	Maxima, based on AVE estimates are printed in italics; this also applies in cases when the <i>ad valorem</i> is part of a compound or mixed duty as ceiling or floor.
US\$	United States dollar

The statistics related to applied tariffs and imports are calculated using data which are based on the HS nomenclature adopted by the country for the reference year. For statistics on bound tariffs, the calculations are based on the approved schedule of concessions of the WTO member. In previous issues of World Tariff Profiles, each schedule is based on the HS version which the member used when it acceded to the WTO. Starting with the 2010 issue of this publication, bound tariff statistics are based on the approved schedule of concessions for each member in the most recent HS version. This might have some implications on the historical series of various bound tariff indicators affected by the use of a different nomenclature. While the member's commitments have not changed as a result of the transposition, some aggregate statistics might have been affected as a consequence of the change to another HS version.

The classification of products into agricultural and non-agricultural is based on Annex 1 of the WTO Agreement on Agriculture which lists all products covered in the Agreement. The Annex enumerates HS codes that are subject to the agriculture negotiations in the WTO and are considered agricultural products. HS codes which are not in Annex 1 are subject to the non-agricultural market access negotiations and are considered non-agricultural products.

In the comparison of bound and applied duties within countries and across countries, the following caveats need to be taken into account besides that of the effects of different HS versions used and

nomenclature breakdowns. These are: (1) binding coverage; (2) tariff bindings not fully implemented; and (3) AVEs.

- While binding commitments cover all agricultural products, in principle, this is not always the case for non-agricultural goods. There are a number of WTO members where the binding coverage for non-agricultural products is less – and sometimes much less – than 100 per cent. Also, a number of developed countries have not yet fully bound all the tariff lines in their schedules. Any comparison of bound and applied tariff indicators is only valid in cases of full binding coverage.
- For most WTO members, except the most recently acceded ones, all commitments dating back to the Uruguay Round have by now been implemented. In cases where commitments are not yet fully implemented, one may see MFN applied averages or maxima exceeding the corresponding bound duty indicators.
- Last but not least, the calculation of AVEs may affect the comparison between bound and applied duties when the changes in nomenclature have resulted in the use of different unit values. In other cases, bound duties have been expressed in a way that is not directly comparable with the currently used applied duties. In a number of cases, the estimated MFN applied AVEs were adjusted when the corresponding bound tariff lines were defined in *ad valorem* terms. In these cases, the corresponding bound *ad valorem* duty was used as ceiling for the AVE estimate.

This publication covers the latest available tariff data (either 2020 or 2019) and the latest available import data (either 2019 or 2018). The tariff information provided for the European Union covers its 28 member states as of 1 January 2020. The United Kingdom withdrew from the European Union as of 1 February 2020. The European Union and the United Kingdom have communicated that during the transition period, which ended on 31 December 2020, European Union law, with a few limited exceptions, continued to be applicable to and in the United Kingdom. During that transition period, the EU most-favoured nation (MFN) applied and preferential tariffs continued to be applicable in the United Kingdom.

Introduction

WTO

The World Trade Organization (WTO) is the only global international organization dealing with the rules of trade between nations. At its heart are the WTO agreements, negotiated and signed by the bulk of the world's trading nations and ratified in their parliaments. The goal is to help producers of goods and services, exporters, and importers conduct their business. The WTO's main function is to ensure that trade flows as smoothly, predictably and freely as possible. It does this by administering trade agreements, acting as a forum for trade negotiations, settling trade disputes, reviewing national trade policies, assisting developing countries in trade policy issues through technical assistance and training programmes and cooperating with other international organizations.

ITC

The International Trade Centre (ITC) is the joint agency of the World Trade Organization and the United Nations. ITC enables small business export success in developing countries by providing, with partners, sustainable and inclusive trade development solutions to the private sector, trade support institutions and policymakers. ITC's strategic objectives are to strengthen the international competitiveness of enterprises, to develop the capacity of trade service providers to support businesses, and to support policymakers in integrating the business sector into the global economy.

UNCTAD

Established in 1964, the United Nations Conference on Trade and Development (UNCTAD) promotes the development-friendly integration of developing countries into the world economy. UNCTAD has progressively evolved into an authoritative knowledge-based institution whose work aims to help shape current policy debates and thinking on development, with a particular focus on ensuring that domestic policies and international action are mutually supportive in bringing about sustainable development.

The *World Tariff Profiles* is a joint publication of the WTO, ITC and UNCTAD devoted to market access for goods. This statistical yearbook contains a comprehensive compilation of the main tariff parameters for each of the 164 WTO members plus other countries and customs territories where data is available. Each tariff profile presents information on tariffs imposed by each economy on its imports complemented with an analysis of the market access conditions it faces in its major export markets.

Statistics for all countries and territories are given in standardized tables which allow easy comparisons between countries/territories, between sectors and, specifically for WTO members, between bound and applied tariffs as well. The calculations are based on national tariff schedules and imports in conformity with a standard Harmonized System (HS) nomenclature version. To the extent possible, *ad valorem* equivalents (AVEs) of non-*ad valorem* tariffs are estimated and are included in the estimation of tariff indicators. Nonetheless, certain caveats apply in the interpretation of these indicators and the reader is advised to read the methodological notes that precede the statistical tables.

The publication is presented in five main parts. The first part shows summary tariff and trade statistics for all countries and territories for all products, as well as a breakdown into agricultural and non-agricultural products. The second part shows for each of these countries and territories one full page with disaggregation by sectors and duty ranges. It also contains a section on the market access conditions faced in their respective major export markets. The third part covers information on non-tariff measures which are of increasing importance in international trade. The fourth part contains the special topic which presents a new subject in each edition. The annexes are in part five and include the data sources and the compilation of "Frequently Asked Questions".

The **summary tariff tables** in the first part are designed to allow cross-country comparison as well as comparison of the levels of bound and applied duties. Apart from the standard indicators like tariff averages, maxima, percentage of duty-free tariff lines, peaks and non-*ad valorem* duties, it also contains indicators of tariff dispersion such as the number of distinct duties and the coefficient of variation. The calculation of these indicators is based, where applicable, on a pre-aggregation to HS six-digit subheadings, which leads to a standardization across countries and thus makes the comparisons more compatible.

Similarly, the **summary trade table** showing the imports and exports profile facilitates the comparison of selected indicators among the economies listed. The statistics are presented by agricultural and non-agricultural sector as well as for the total economy. The indicators related to the exports profile are based on mirror data reported by the importing economy.

The **tariff profiles** tables are divided into two blocks covering (A) the domestic market access protection and (B) the protection faced in the major export markets. In part A, information on bound and applied duties is shown by duty ranges and by sectors. Information for agricultural and non-agricultural duties is shown separately. In addition, there are indicators on the occurrence of special safeguards and on tariff quotas. In part B, the trade diversification and market access conditions in the five major export markets are depicted, broken down into agricultural and non-agricultural products.

The third part contains the summary tables on anti-dumping actions, countervailing duties and safeguard measures. The new special topic presented on the fourth part is entitled "Non-tariff measures: Estimating analytical indicators using UNCTAD's Trade Analysis Information System (TRAINS)".

I. Summary tables

	Tariff
Description of column headings	6
Technical notes	7
All products	8
Agricultural products	14
Non-agricultural products	20
	Trade
Description of column headings	26
Technical notes	27
Imports and Exports profile	28

Description of column headings

Column headings	Description or method of calculation
Year of MFN applied tariff	Calendar year or start of fiscal year
Binding coverage	Share of HS six-digit subheadings containing at least one bound tariff line. Full binding coverage is indicated by 100 without further decimals. If some tariff lines are unbound but the result still rounds to 100 this is reflected by maintaining one decimal, i.e. 100.0.
Simple average	Simple average of the <i>ad valorem</i> or AVE HS six-digit duty averages.
Duty-free	Share of duty-free HS six-digit subheadings in the total number of subheadings in the product group. Partially duty-free subheadings are taken into account on a <i>pro rata</i> basis.
Non- <i>ad valorem</i> duties	Share of HS six-digit subheadings subject to non- <i>ad valorem</i> duties. When only part of the HS six-digit subheading is subject to non- <i>ad valorem</i> duties the percentage share of these tariff lines is used.
Duties > 15 %	Share of HS six-digit subheadings subject to <i>ad valorem</i> duties or AVEs greater than 15 per cent. When only part of the HS six-digit subheading is covered by such duties, the calculation is done on a <i>pro rata</i> basis.
Duties > 3 × AVG	Share of HS six-digit subheadings subject to <i>ad valorem</i> duties or AVEs greater than three times the national average. When only part of the HS six-digit subheading is covered by such duties, the calculation is done on a <i>pro rata</i> basis.
Concessions not yet implemented in 2020	Share of HS six-digit bound subheadings not yet implemented in 2020. When only part of the HS six-digit subheading is covered by such duties the calculation is made on a <i>pro rata</i> basis.
Maximum duty	Maximum tariff line level <i>ad valorem</i> duty or AVE.
Number of distinct duty rates	Number of distinct duty rates. Non- <i>ad valorem</i> duties are always treated as distinct because AVE calculations would always yield distinct AVEs. For this indicator, however, duties not provided are not included in the count.
Coefficient of variation	Standard deviation of tariff line duty rates divided by the simple tariff line level average of all duty rates. Includes only <i>ad valorem</i> duties or AVEs.
Number of MFN applied tariff lines	Total number of MFN applied tariff lines

Technical notes

Only duties and imports recorded under HS Chapters 01–97 are taken into account. Each applied tariff schedule is validated against the standard nomenclature at the HS six-digit subheading level of the HS version adopted by the country for the reference year. National tariff lines that do not follow this standard (i.e., the first six digits should be based on the standard subheading nomenclature of the HS version used by the country) are discarded and not taken into account. On the other hand, missing subheadings are added. Hence,

all calculations are based on the complete standard nomenclature. All simple averages are based on pre-aggregated HS six-digit averages. Pre-aggregation means that duties at the tariff line level are first averaged to HS six-digit subheadings. Subsequent calculations are based on these pre-aggregated averages.

To the extent possible, non-*ad valorem* duties are converted into *ad valorem* equivalents. The methodology used for the conversion is in Technical Annex B of *World Tariff Profiles 2006*.

Description of column headings

Column headings	Description or method of calculation	
All indicators are calculated by sector and for all products.		
Imports Profile	Trade Year	Calendar year or start of fiscal year for trade data notified by reporting country/territory.
	Value of imports	Total amount of imports in billion US\$.
	Trade Weighted Average MFN Applied Tariff	HS six-digit MFN tariff averages weighted with HS six-digit import flows for traded national tariff lines.
	Duty-free imports	Share of imports of products for which the MFN duty is zero
Export profile statistics are based on reported imports of partner markets from the country/territory for the year indicated in Part B of the country table. Thus, the data are limited only to markets with notified imports data.		
Exports Profile	Diversification Index HS Chapter	Number of distinct HS chapters with trade flows after the exclusion of 5 per cent of smallest bilateral tariff line trade flows.
	Diversification Index HS 6-digit	Number of distinct HS 6-digit sub-headings with trade flows after the exclusion of 5 per cent of smallest bilateral tariff line trade flows.
	Applied Weighted Tariff Faced in Major Markets	Actual MFN or preferential tariff imposed by the five major trading partners in each sector to the products they import from the country/territory (i.e., to the products exported by the country/territory).

Technical notes

The indicators related to the imports profile are calculated from the reported imports data of the country. However, the exports profile are based on mirror data or the imports reported by the partner from the country. Thus, only data of reporting partners are included in the calculation of indicators for the exports profile.

Only duties and imports recorded under HS Chapters 01-97 are taken into account. Each applied tariff schedule is validated against the standard nomenclature at the HS six-digit subheading level of the HS version adopted by the country for the reference year. National tariff lines that do not follow this standard (i.e., the first six digits should be

based on the standard subheading nomenclature of the HS version used by the country) are discarded and not taken into account. On the other hand, missing subheadings are added. Hence, all calculations are based on the complete standard nomenclature. All simple averages are based on pre-aggregated HS six-digit averages. Pre-aggregation means that duties at the tariff line level are first averaged to HS six-digit subheadings. Subsequent calculations are based on these pre-aggregated averages.

To the extent possible, non-*ad valorem* duties are converted into *ad valorem* equivalents. The methodology used for the conversion is in Technical Annex B of *World Tariff Profiles 2006*.

1. The information provided by the European Union covers its 28 member States from 1 July 2013 until 31 January 2020. The United Kingdom withdrew from the European Union as of 1 February 2020. The reference years for this publication are 2020 for tariffs and 2019 for imports. The EU most-favoured nation (MFN) applied and preferential tariffs continued to be applicable in the United Kingdom during the transition period which ended on 31 December 2020.
2. The information provided by Switzerland covers Liechtenstein.

Part A.1

Tariffs and imports: Summary and duty ranges

Row titles	Description or method of calculation
Simple average final bound	Simple average of final bound duties excluding unbound tariff lines.
Simple average MFN applied	Simple average of MFN applied duties.
Trade weighted average	HS six-digit MFN tariff averages weighted with HS six-digit import flows for traded national tariff lines.
Imports in billion US\$	Imports in billion US\$.
Binding coverage	Share of HS six-digit subheadings containing at least one bound tariff line. The percentage share is also presented separately for non-agricultural (Non-AG) tariff lines. Full binding coverage is indicated by 100 without further decimals. If some tariff lines are unbound but the result still rounds to 100 this is reflected by maintaining one decimal, i.e. 100.0.
AG: Tariff quotas (in %)	Per cent of HS six-digit subheadings in the schedule of agricultural concession covered by tariff quotas. Partial coverage is taken into account on a <i>pro rata</i> basis.
AG: Special safeguards (in %)	Per cent of HS six-digit subheadings in the schedule of agricultural concessions with at least one tariff line subject to Special Safeguards (SSG). Partial coverage is taken into account on a <i>pro rata</i> basis.

Technical notes

Only duties and imports recorded under HS Chapters 01-97 are taken into account. Each applied tariff schedule is validated against the standard nomenclature at the HS six-digit subheading level of the HS version adopted by the country for the reference year. National tariff lines that do not follow this standard (i.e., the first six digits should be based on the standard subheading nomenclature of the HS version used by the country) are discarded and not taken into account. On the other hand, missing subheadings are added. Hence, all calculations are based on the complete standard nomenclature. All simple averages are based on pre-aggregated HS six-digit averages. Pre-aggregation means that duties at the tariff line level are first averaged to HS six-digit subheadings. Subsequent calculations are based on these pre-aggregated averages.

To the extent possible, non-*ad valorem* duties are converted into *ad valorem* equivalents. The methodology used for the conversion is in Technical Annex B of *World Tariff Profiles 2006*.

Part A.2 Tariffs and imports by product groups

Column heading		Description or method of calculation
Final bound duties	AVG	Simple average of final bound duties excluding unbound tariff lines
	Duty free	Share of duty-free HS six-digit subheadings in the total number of subheadings in the product group. Partially duty-free subheadings are taken into account on a <i>pro rata</i> basis.
	Max	Highest <i>ad valorem</i> duty or calculated AVE within the product group
	Binding in %	Share of HS six-digit subheadings containing at least one bound tariff line. Full binding coverage is indicated by 100 without further decimals. If some tariff lines are unbound but the result still rounds to 100 this is reflected by maintaining one decimal, i.e. 100.0.
MFN applied duties	AVG	Simple average of MFN applied duties.
	Duty free	Share of duty-free HS six-digit subheadings in the total number of subheadings in the product group. Partially duty-free subheadings are taken into account on a <i>pro rata</i> basis.
	Max	Highest <i>ad valorem</i> duty or calculated AVE within the product group
Imports	Share in %	Share of imports falling under product group
	Duty free in %	Share of MFN duty-free imports falling under product group in total imports in that product group. Partially duty-free subheadings are taken into account on a <i>pro rata</i> basis if tariff line imports are not available.

Frequency distribution by duty ranges

The shares by duty ranges in the frequency distribution are based on the *pro rata* shares of tariff line level duties in the standard HS six-digit subheadings. For example, if there are two tariff lines in one HS six-digit subheading, one with a duty of 10 and one with a duty of 20, then half of the HS six-digit subheading is allocated to the 5–10 range and the other half to the 15–25 range. The frequency distribution includes AVEs whenever those were calculated. The percentages by duty ranges add up to 100 per cent for MFN applied duties unless there are non-computable AVEs or missing tariff lines for which no separate category was allocated. For bound duties, the duty ranges add up to the percentage of the binding coverage unless there are non-computable AVEs or missing tariff lines. Please note that the use of different nomenclatures for bound and MFN applied duties affects the comparability of bound and MFN applied duty shares by frequency ranges.

When trade is available at the tariff line level, imports are allocated on a tariff line basis to the respective duty ranges. Otherwise, HS six-digit imports are allocated on a *pro rata* basis to duty ranges, e.g. if there are two tariff lines in one HS six-digit subheading, one with a duty of 10 and one with a duty of 20 then half of the HS six-digit imports are allocated to the 5–10 range and the other half to the 15–25 range.

Share of HS six-digit subheadings subject to non-*ad valorem* duties: when only part of the HS six-digit subheading is subject to non-*ad valorem* duties, the percentage share of these tariff lines is used.

Part B

Exports to major trading partners and duties faced

Column heading		Description or method of calculation
Bilateral imports	in Mill US\$	Total imports of major partner countries
Diversification: 95 % trade in no. of	HS 2 digit	Number of HS Chapters with trade flows after exclusion of 5 per cent of smallest bilateral tariff line trade flows.
	HS 6 digit	Number of HS six-digit subheadings with trade flows after exclusion of 5 per cent of smallest bilateral tariff line trade flows
MFN Average of traded TL	Simple	Simple average of MFN duties based only on tariff lines with imports
	Weighted	Trade-weighted average MFN duty
Preference margin	Weighted	Trade-weighted average difference between the MFN duty and the most advantageous preferential duty. Tariff lines where either MFN or preferential duties cannot be expressed in <i>ad valorem</i> terms have been excluded.
Duty-free imports	TL in %	Duty-free tariff lines in per cent of all bilateral trade flows; includes duty-free preferential treatment. Partially duty-free subheadings are taken into account on a <i>pro rata</i> basis if tariff line imports are not available.
	Value in %	Share of duty-free trade in per cent of all bilateral trade flows; includes duty-free preferential treatment. Partially duty-free subheadings are taken into account on a <i>pro rata</i> basis if tariff line imports are not available.

1. Multilateral Trade Negotiations (MTN) categories were first defined in the Tokyo Round and adapted for the Harmonized System in the Uruguay Round. The product group breakdown in this publication deviates slightly from the previous definition, which was based on the HS 1992 nomenclature.

Definition of groups used in part A.2

Product Group	MTN ¹	Harmonized System nomenclature 2017
Agricultural products (Ag)		
Animal products	17	Ch. 01, Ch. 02, 1601-02

2. The part of HS subheading 330210 which relates to products originally classified as agricultural has not been taken into account in the Chemicals product group.

Definition of groups used in part A.2

Product Group	MTN	Harmonized System nomenclature 2017
Non-agricultural products (Non-Ag)		
Fish and fish products	11	Ch. 03, 0508, 051191, 150410, 150420, 1603-05, 230120
Minerals and metals	4	2601-17, 2620, Ch. 72-76 (except 7321-22), Ch. 78-83 (except 8304-05)
	9	Ch. 25, 2618-19, 2621, 2701-04, 2706-08, 2711-15, Ch.31, 3403, Ch. 68-71 (except 6807, 701911-19, 701940-59), 911310-20
Petroleum	97	2709-10
Chemicals ²	5	2705, Ch. 28-30 (except 290543-45, 300590), Ch. 32-33 (except 3301, 330620), Ch. 34 (except 3403, 3406), 3506-07, 3601-04, Ch. 37-39 (except 380910, 3823, 382460, 392112-13, 392190)
Wood, paper, etc.	1	Ch.44, 45, 47, 48, 49, 9401-04 (except 940490), 961900
Textiles	x2	300590, 330620, 392112-13, 392190, 420212, 420222, 420232, 420292, Ch. 50-60 (except 5001-03, 5101-03, 5201-03, 5301-02), Ch. 63, 640520, 640610, 6501-05, 6601, 701911-19, 701940-59, 870821, 8804, 911390, 940490, 961210
Clothing	x2	Ch. 61-62
Leather, footwear, etc.	3	Ch. 40, Ch. 41 (except 4101-4103), 4201-05 (except 420212, 420222, 420232, 420292), 4302-04, Ch. 64 (except 640520, 640610), 9605
Non-electrical machinery	7	7321-22, Ch. 84 (except 846721-29), 850860, 852842, 852852, 852862, 8608, 8709
Electrical machinery	8	846721-29, Ch. 85 (except 850860, 852842, 852852, 852862, 8519-8523 but including 852352)
Transport equipment	6	Ch. 86 (except 8608), 8701-08 (except 870821), 8711-14, 8716, 8801-03, Ch. 89
Manufactures, not elsewhere specified	10	2716, 3406, 3605-06, 4206, Ch. 46, 6506-07, 6602-03, Ch. 67, 6807, 8304-05, 8519-23 (excluding 852352), 8710, 8715, 8805, Ch. 90-93 (except 9113), 9405-06, Ch. 95-97 (except 9605, 961210, 961900)

Part A.1 Tariffs and imports: Summary and duty ranges

Summary		Total	Ag	Non-Ag	WTO member since		2016
Simple average final bound		13.4	33.8	10.1	Binding coverage:		Total 96.7
Simple average MFN applied							Non-Ag 96.1
Trade weighted average					Ag: Tariff quotas (in %)		0
Imports in billion US\$					Ag: Special safeguards (in %)		0

Frequency distribution	Duty-free	0 <= 5	5 <= 10	10 <= 15	15 <= 25	25 <= 50	50 <= 100	> 100	NAV in %
	Tariff lines and import values (in %)								
Agricultural products									
Final bound	0.4	0.7	18.9	0	19.6	31.0	23.8	0	5.5
MFN applied									
Imports									
Non-agricultural products									
Final bound	10.1	26.6	38.5	0.1	10.5	10.3	0	0	0

III. Non-tariff measures

1. Non-tariff measures introduction	197
2. Statistics on some selected non-tariff measures	198
2.1. Anti-dumping	198
2.2. Countervailing measures	209
2.3. Safeguards	218

1. Introduction

Non-tariff measures (NTMs) are becoming more and more relevant in their influence on global trade patterns as the reductions in tariff rates over several rounds of multilateral tariff negotiations have diminished the impact of tariffs. There is no officially agreed definition of NTMs. However, a widely accepted definition is the one from the Group of Eminent Persons on Non-Tariff Barriers: “NTMs are policy measures, other than [ordinary] customs tariffs, that can potentially have an economic effect on international trade in goods, changing quantities traded, or prices or both”.¹

The definition of NTMs does not judge legitimacy, adequacy, necessity or the discriminatory nature of any form of policy intervention. Furthermore, the concept of NTMs is neutral and does not imply a negative or positive impact on trade. The existence of a NTM on a specific product in a given country per se, vis-à-vis non-existence of NTM in another country, would not mean the former has a more restrictive trade regime. It would depend on the nature, substance and application of the measure. Some NTMs might have a positive impact on trade, though many NTMs are thought to have important restrictive and/or distortionary effects on international trade regardless of whether they are applied with protectionist intent or to address important non-trade objectives. NTMs include technical requirements in the area of Sanitary and Phytosanitary (SPS) measures and Technical Barriers to Trade (TBT) that intend to protect health or safety, or provide environmental protection. A NTM is a mandatory requirement enacted by an official law or regulation. Voluntary measures or private or voluntary standards are not included. Thus, international standards, such as ISO or Codex Alimentarius standards, are not considered a NTM unless adopted and made part of the national legislation in a country. Procedural obstacles to trade, i.e. practical challenges and processes that make compliance with the measures difficult, are also not considered as NTMs per se. Procedural obstacles are issues related to the process of application of a NTM, rather than the measure itself.

1. Non-Tariff Measures: Evidence from Selected Developing Countries and Future Research Agenda, UNCTAD/DITC/TAB/2009/3, United Nations 2010.

2. Statistics on some selected non-tariff measures

2.1. Anti-dumping

When a company exports a product at a price lower than the price it normally charges in its own home market, it is said to be “dumping” the product. The normal value is generally the price of the product at issue, in the ordinary course of trade, when destined for consumption in the exporting country market.² The WTO Agreement does not regulate the actions of companies engaged in “dumping”. Its focus is on how governments can or cannot react to dumping — it disciplines anti-dumping actions.

Data on anti-dumping (AD) measures drawn from WTO members’ notifications are available in the Integrated Trade Intelligence Portal and are the basis for the data shown here.³ Some notifications lack detailed information about product classifications according to the Harmonized System (HS)

nomenclature. Missing HS coding information was complemented from the Global Antidumping Database (GAD) which is part of the World Bank’s Temporary Trade Barriers Database.⁴ The GAD database is freely available and has detailed information about anti-dumping investigations and measures by country. The use of the data for this publication was kindly authorized by the author of the database. The merged data are available in the UNCTAD TRAINS database.⁵

The following tables show systematically the measure count for both the WTO member imposing the measures and the trading partner affected by the measures. It is worth noting that AD measures are also applied on exports from some countries currently acceding to the WTO and others that are not WTO members.

Table 2.1.1 gives an overview of the (stock of) measures in effect as of 31 December 2020. It indicates the product coverage in terms of HS-6 digit codes. It also lists by WTO member how many new investigations have been initiated, how many final measures have been put into effect and how many measures were withdrawn.

Tables 2.1.2 and 2.1.3 show more specifically which product groups have been subject to final AD measures.⁶ In Table 2.1.2 the product categories follow the groupings used in this publication in Part A2 of the tariff profiles whereas in Table 2.1.3 more detailed HS 4-digit headings are used to show in detail which products are most frequently subject to final AD measures.⁷

2. See also: https://www.wto.org/english/tratop_e/adp_e/adp_e.htm .

3. See <http://i-tip.wto.org>

4. See Chad P. Bown (2015) “Global Antidumping Database”, available at <https://datacatalog.worldbank.org/dataset/temporary-trade-barriers-database-including-global-antidumping-database>

5. See <http://unctad.org/en/Pages/DITC/Trade-Analysis/Non-Tariff-Measures/NTMs-trains.aspx>

6. Please note that the sum of measures in Table 2.1.2 is higher than the sum of measures in Table 2.1.1. This is due to the fact that a number of individual measures cover products which fall in more than one product group. Therefore a single measure may be listed more than once in Table 2.1.2 as well as in Table 2.1.3.

7. The choice of the G-20 country grouping was made to align this report with the grouping chosen for the WTO trade monitoring reports.

Table 2.1.1. Anti-dumping measures in effect in 2020

Description of column headings

Country/Territory			Name of importing/exporting country/territory	
Measures taken as importer	From 1 January to 31 December 2020	Investigations initiated		Number of investigations initiated by the country as importer in 2020
		Final measures	Implemented	Number of final measures implemented by the country as importer in 2020
			Withdrawn/Revoked	Number of final measures withdrawn or revoked by the country as importer in 2020
	As of 31 December 2020	Final measures in effect	Number of measures	Number of final measures in effect on products imported by the country as of 31 December 2020
			Products covered (Number of HS 6-digit)	Number of distinct HS 6-digit subheadings covered (fully or partially) by products on which final measures by the importing country were in force as of 31 December 2020
		Investigations initiated		Number of investigations initiated on products exported by the country in 2020
Measures faced as exporter	From 1 January to 31 December 2020	Final measures	Implemented	Number of final measures implemented on products exported by the country in 2020
			Withdrawn/Revoked	Number of final measures on products exported by the country withdrawn or revoked in 2020
		As of 31 December 2020	Final measures in effect	Number of measures
	Products covered (Number of HS 6-digit)			Number of distinct HS 6-digit subheadings covered (fully or partially) by products on which the country as exporter is subject to final measures as of 31 December 2020

Note:

All members submitting semi-annual reports of anti-dumping actions are listed individually. Where listed members take action on a customs-union-wide basis, the figures on numbers of actions are shown for the WTO member in which the investigating authority is physically located. As indicated below, to avoid multiple-counting, the rows for the other reporting customs union members are left blank.

- All anti-dumping actions notified by the European Union operate EU-wide, i.e., in respect of all EU member states, which do not notify individually.
 - All anti-dumping actions notified by South Africa operate at the level of the Southern African Customs Union, i.e., also in respect of Botswana, Eswatini, Lesotho and Namibia.
- All actions identified in respect of the Russian Federation for 2015 and thereafter operate at the level of the Eurasian Economic Union, i.e., also in respect of Armenia, Kyrgyz Republic, Kazakhstan and Belarus (non-WTO member).
- Some anti-circumvention measures may be included.

Table 2.1.3. Anti-dumping final measures in effect as of 31 December 2020 – ranked list of the 20 most frequently affected HS headings

Description of column headings

Product group/HS Heading description		These are product groups of the Harmonized System at the HS 4-digit Heading level. They are ranked according to the number of total final measures in effect.
Total number of measures		Total number of final measures affecting products in a given HS Heading
Final measures in effect as of 31 December 2020 in the country group as importer	QUAD	Final measures of Canada, EU, Japan or the United States as importers
	G-20 (excluding QUAD)	Final measures of G-20 members excluding QUAD – as importers: Argentina, Australia, Brazil, China, India, Indonesia, Republic of Korea, Mexico, Russian Federation, Saudi Arabia, South Africa, and Turkey
	Other	Final measures of other importing countries
Final measures in effect as of 31 December 2020 against the country group as exporter	QUAD	Final measures affecting Canada, EU, Japan or the United States as exporters
	G-20 (excluding QUAD)	Final measures affecting G-20 members excluding QUAD – as exporters: Argentina, Australia, Brazil, China, India, Indonesia, Republic of Korea, Mexico, Russian Federation, Saudi Arabia, South Africa, and Turkey
	Others	Final measures affecting other exporting countries

Table 2.1.3. Anti-dumping final measures in effect as of 31 December 2020 – ranked list of the 20 most frequently affected HS headings

Product group/HS heading description	HS 4-digit Code	Total number of measures	Final measures in effect as of 31 December 2020 in the country group as importer			Final measures in effect as of 31 December 2020 in the country group as exporter		
			QUAD	G20 (excluding QUAD)	Other	QUAD	G20 (excluding QUAD)	Other
Flat-rolled products of alloy steel other than stainless, of a width of ≥ 600 mm, hot-rolled or cold-rolled "cold-reduced"	7225	140	71	42	27	15	95	30
Flat-rolled products of iron or non-alloy steel, of a width ≥ 600 mm, hot-rolled, not clad, plated or coated	7208	110	52	33	25	6	68	36
Flat-rolled products of alloy steel other than stainless, of a width of < 600 mm, hot-rolled or cold-rolled "cold-reduced"	7226	104	67	24	13	10	73	21
Flat-rolled products of iron or non-alloy steel, of a width ≥ 600 mm, hot-rolled or cold-rolled "cold-reduced", clad, plated or coated	7210	103	55	19	29	9	70	24
Flat-rolled products of iron or non-alloy steel, of a width of < 600 mm, hot-rolled or cold-rolled "cold-reduced", not clad, plated or coated	7211	95	50	16	29	8	61	26
Tubes, pipes and hollow profiles "e.g., open seam or welded, riveted or similarly closed", of iron or steel (excl. of cast iron, seamless tubes and pipes and tubes having internal and external circular cross-sections and an external diameter of > 406,4 mm)	7306	90	70	13	7		53	37
Flat-rolled products of iron or non-alloy steel, of a width of < 600 mm, hot-rolled or cold-rolled "cold-reduced", clad, plated or coated	7212	81	52	12	17	6	58	17
Tubes, pipes and hollow profiles, seamless, of iron or steel (excl. products of cast iron)	7304	60	35	22	3	5	39	16
Bars and rods of iron or non-alloy steel, hot-rolled, in irregularly wound coils	7213	51	30	12	9	2	28	21
Other bars and rods of alloy steel other than stainless, angles, shapes and sections of alloy steel other than stainless, n.e.s.; hollow drill bars and rods, of alloy or non-alloy steel	7228	46	22	14	10	4	30	12
Bars and rods, of iron or non-alloy steel, not further worked than forged, hot-rolled, hot-drawn or hot-extruded, but incl. those twisted after rolling (excl. in irregularly wound coils)	7214	46	30	6	10	3	30	13
Plates, sheets, film, foil and strip, of non-cellular plastics, not reinforced, laminated, supported or similarly combined with other materials, without backing, unworked or merely surface-worked or merely cut into squares or rectangles (excl. self-adhesive products, and floor, wall and ceiling coverings of heading 3918)	3920	44	8	29	7		23	21
Bars and rods of alloy steel other than stainless, hot-rolled, in irregularly wound coils	7227	43	25	9	9	2	23	18
Flat-rolled products of iron or non-alloy steel, of a width of ≥ 600 mm, cold-rolled "cold-reduced", not clad, plated or coated	7209	40	11	13	16	5	25	10
New pneumatic tyres, of rubber	4011	40	4	36		1	22	17
Flat-rolled products of stainless steel, of a width of ≥ 600 mm, hot-rolled or cold-rolled "cold-reduced"	7219	38	7	16	15	8	19	11
Tube or pipe fittings "e.g. couplings, elbows, sleeves", of iron or steel	7307	37	26	11		1	26	10
Acyclic alcohols and their halogenated, sulphonated, nitrated or nitrosated derivatives	2905	31	6	24	1	7	13	11

Table 2.1.3. Anti-dumping final measures in effect as of 31 December 2020 – ranked list of the 20 most frequently affected HS headings

Product group/HS heading description	HS 4-digit Code	Total number of measures	Final measures in effect as of 31 December 2020 in the country group as importer			Final measures in effect as of 31 December 2020 in the country group as exporter		
			QUAD	G20 (excluding QUAD)	Other	QUAD	G20 (excluding QUAD)	Other
Tubes and pipes, having circular cross-sections and an external diameter of > 406,4 mm, of flat-rolled products of iron or steel "e.g., welded, riveted or similarly closed"	7305	30	19	5	6	5	18	7
Bars and rods, of iron or non-alloy steel, cold-formed or cold-finished, whether or not further worked, or hot-formed and further worked, n.e.s.	7215	29	26	2	1	4	19	6
Float glass and surface ground or polished glass, in sheets, whether or not having an absorbent, reflecting or non-reflecting layer, but not otherwise worked	7005	27	1	25	1	1	16	10
Synthetic filament yarn, incl. synthetic monofilaments of < 67 decitex (excl. sewing thread and yarn put up for retail sale)	5402	27	3	22	2		16	11
Polymers of vinyl chloride or of other halogenated olefins, in primary forms	3904	26		19	7	7	14	5
Phenols; phenol-alcohols	2907	26	1	25		11	9	6
Stranded wire, ropes, cables, plaited bands, slings and the like, of iron or steel (excl. electrically insulated products and twisted fencing wire and barbed wire)	7312	24	10	11	3	1	20	3
Flat-rolled products of stainless steel, of a width of < 600 mm, hot-rolled or cold-rolled "cold-reduced"	7220	24	7	8	9	5	12	7
Uncoated paper and paperboard, of a kind used for writing, printing or other graphic purposes, and non-perforated punchcards and punch-tape paper, in rolls or in square or rectangular sheets, of any size, and handmade paper and paperboard (excl. newsprint of heading 4801 and paper of heading 4803)	4802	24	7	12	5	1	16	7
Synthetic rubber and factice derived from oils, in primary forms or in plates, sheets or strip; mixtures of natural rubber, balata, gutta-percha, guayule, chicle or similar types of natural rubber with synthetic rubber or factice, in primary forms or in plates, sheets or strip	4002	23	4	19		11	9	3
Synthetic staple fibres, not carded, combed or otherwise processed for spinning	5503	22	9	12	1	1	15	6
Oxygen-function amino-compounds	2922	21	9	10	2	5	11	5
Ketones and quinones, whether or not with other oxygen function, and their halogenated, sulphonated, nitrated or nitrosated derivatives	2914	21	6	15		5	9	7
Ferro-alloys	7202	20	10	10		2	11	7
Polyacetals, other polyethers and epoxide resins, in primary forms; polycarbonates, alkyd resins, polyallyl esters and other polyesters, in primary forms	3907	20	4	16		1	12	7

2.2. Countervailing measures

Dumping and subsidies — together with anti-dumping (AD) measures and countervailing duties (CVD) — share a number of similarities. The reaction to dumping and subsidies is often a special offsetting import tax (countervailing duty in the case of a subsidy). This is charged on products from specific countries and therefore it breaks the GATT principles of binding a tariff and treating trading partners equally (MFN). The agreements provide an escape clause, but they both also say that before imposing a duty, the importing country must conduct a detailed investigation that shows that domestic industry is hurt. But there are also fundamental differences, and these are reflected in the agreements.

Dumping is an action by a company. With subsidies, it is the government or a government agency that acts, either by paying out subsidies directly or by requiring companies to subsidize certain customers. Countervailing duty (the parallel of anti-dumping duty) can only be charged after the importing country has conducted a detailed investigation similar to that required for anti-dumping action.⁸ Data on countervailing (CVD) measures drawn from WTO members' notifications are available in the Integrated Trade Intelligence Portal and are the basis for the data shown here.⁹

Table 2.2.1 gives an overview of the (stock of) measures in effect as of 31 December 2020. It indicates the

product coverage in terms of HS-6 digit codes. It also lists by country how many new investigations have been initiated, how many final measures have been put into effect and how many measures were withdrawn.

Tables 2.2.2 and 2.2.3 show more specifically which product groups have been subject to final CVD measures.¹⁰ In Table 2.2.2 the product categories follow the groupings used in this publication in Part A.2 of the tariff profiles whereas in Table 2.2.3 more detailed HS 4-digit headings are used to show in detail which products are most frequently subject to final CVD measures.¹¹

8. https://www.wto.org/english/tratop_e/scm_e/scm_e.htm

9. See <http://i-tip.wto.org>

10. Please note that the sum of measures in Table 2.2.2 is higher than the sum of measures in Table 2.2.1. This is due to the fact that a number of individual measures cover products which fall in more than one product group. Therefore a single measure may be listed more than once in Table 2.2.2 as well as in Table 2.2.3.

11. The choice of the G-20 country grouping was made to align this report with the grouping chosen for the WTO trade monitoring reports.

Table 2.2.1. Countervailing measures in effect in 2020

Description of column headings

Country/Territory			Name of importing/exporting country/territory	
Measures taken as importer	From 1 January to 31 December 2020	Investigations initiated		Number of investigations initiated by the country as importer in 2020
		Final measures	Implemented	Number of final measures implemented by the country as importer in 2020
			Withdrawn/Revoked	Number of final measures withdrawn or revoked by the country as importer in 2020
	As of 31 December 2020	Final measures in effect	Number of measures	Number of final measures in effect on products imported by the country as of 31 December 2020
			Products covered (Number of HS 6-digit)	Number of distinct HS 6-digit subheadings covered (fully or partially) by products on which final measures by the importing country were in force as of 31 December 2020
		Investigations initiated		Number of investigations initiated on products exported by the country in 2020
Measures faced as exporter	From 1 January to 31 December 2020	Final measures	Implemented	Number of final measures implemented on products exported by the country in 2020
			Withdrawn/Revoked	Number of final measures on products exported by the country withdrawn or revoked in 2020
		As of 31 December 2020	Final measures in effect	Number of measures
	Products covered (Number of HS 6-digit)			Number of distinct HS 6-digit subheadings covered (fully or partially) by products on which the country as exporter is subject to final measures as of 31 December 2020

Table 2.2.3. Countervailing final measures in effect as of 31 December 2020 – ranked list of the most frequently affected HS headings

Description of column headings

Product group / HS Heading description		These are product groups of the Harmonized System at the HS 4-digit Heading level. They are ranked according to the number of total final measures in effect.
Total number of measures		Total number of final measures affecting products in a given HS Heading
Final measures in effect as of 31 December 2020 in the country group as importer	QUAD	Final measures of Canada, EU, Japan or the United States as importers
	G-20 (excluding QUAD)	Final measures of G-20 members excluding QUAD – as importers: Argentina, Australia, Brazil, China, India, Indonesia, Republic of Korea, Mexico, Russian Federation, Saudi Arabia, South Africa, and Turkey
	Other	Final measures of other importing countries
Final measures in effect as of 31 December 2020 against the country group as exporter	QUAD	Final measures affecting Canada, EU, Japan or the United States as exporters
	G-20 (excluding QUAD)	Final measures affecting G-20 members excluding QUAD – as exporters: Argentina, Australia, Brazil, China, India, Indonesia, Republic of Korea, Mexico, Russian Federation, Saudi Arabia, South Africa, and Turkey
	Others	Final measures affecting other exporting countries

Table 2.2.3. Countervailing final measures in effect as of 31 December 2020 – ranked list of the most frequently affected HS headings

Product group/HS heading description	HS 4-digit Code	Total number of measures	Final measures in effect as of 31 December 2020 in the country group as importer			Final measures in effect as of 31 December 2020 in the country group as exporter		
			QUAD	G20 (excluding QUAD)	Other	QUAD	G20 (excluding QUAD)	Other
Flat-rolled products of iron or non-alloy steel, of a width ≥ 600 mm, hot-rolled or cold-rolled "cold-reduced", clad, plated or coated	7210	23	18	3	2		22	1
Tubes, pipes and hollow profiles "e.g., open seam or welded, riveted or similarly closed", of iron or steel (excl. of cast iron, seamless tubes and pipes and tubes having internal and external circular cross-sections and an external diameter of > 406,4 mm)	7306	20	17	3			19	1
Flat-rolled products of alloy steel other than stainless, of a width of ≥ 600 mm, hot-rolled or cold-rolled "cold-reduced"	7225	19	15	2	2		17	2
Flat-rolled products of iron or non-alloy steel, of a width of < 600 mm, hot-rolled or cold-rolled "cold-reduced", clad, plated or coated	7212	19	15	2	2		18	1
Flat-rolled products of iron or non-alloy steel, of a width of < 600 mm, hot-rolled or cold-rolled "cold-reduced", not clad, plated or coated	7211	19	18		1		17	2
Flat-rolled products of alloy steel other than stainless, of a width of < 600 mm, hot-rolled or cold-rolled "cold-reduced"	7226	17	14	1	2		15	2
Flat-rolled products of iron or non-alloy steel, of a width ≥ 600 mm, hot-rolled, not clad, plated or coated	7208	14	12	1	1		13	1
Tubes and pipes, having circular cross-sections and an external diameter of > 406,4 mm, of flat-rolled products of iron or steel "e.g., welded, riveted or similarly closed"	7305	10	10				10	
Tubes, pipes and hollow profiles, seamless, of iron or steel (excl. products of cast iron)	7304	10	10				10	
Structures and parts of structures "e.g., bridges and bridge-sections, lock-gates, towers, lattice masts, roofs, roofing frameworks, doors and windows and their frames and thresholds for doors, shutters, balustrades, pillars and columns", of iron or steel; plates, rods, angles, shapes, sections, tubes and the like, prepared for use in structures, of iron or steel (excl. prefabricated buildings of heading 9406)	7308	9	9			1	7	1
Bars and rods, of iron or non-alloy steel, cold-formed or cold-finished, whether or not further worked, or hot-formed and further worked, n.e.s.	7215	9	9				8	1
Flat-rolled products of iron or non-alloy steel, of a width of ≥ 600 mm, cold-rolled "cold-reduced", not clad, plated or coated	7209	8	7		1		7	1
Bars and rods of iron or non-alloy steel, hot-rolled, in irregularly wound coils	7213	7	7				7	
Tube or pipe fittings "e.g. couplings, elbows, sleeves", of iron or steel	7307	6	6				6	
Other bars and rods of alloy steel other than stainless, angles, shapes and sections of alloy steel other than stainless, n.e.s.; hollow drill bars and rods, of alloy or non-alloy steel	7228	6	6				5	1
Bars and rods of alloy steel other than stainless, hot-rolled, in irregularly wound coils	7227	6	6				6	

Table 2.2.3. Countervailing final measures in effect as of 31 December 2020 – ranked list of the most frequently affected HS headings

Product group/HS heading description	HS 4-digit Code	Total number of measures	Final measures in effect as of 31 December 2020 in the country group as importer			Final measures in effect as of 31 December 2020 in the country group as exporter		
			QUAD	G20 (excluding QUAD)	Other	QUAD	G20 (excluding QUAD)	Other
Flat-rolled products of stainless steel, of a width of < 600 mm, hot-rolled or cold-rolled "cold-reduced"	7220	6	3	1	2	6		
Flat-rolled products of stainless steel, of a width of ≥ 600 mm, hot-rolled or cold-rolled "cold-reduced"	7219	6	3	1	2	6		
Bars and rods, of iron or non-alloy steel, not further worked than forged, hot-rolled, hot-drawn or hot-extruded, but incl. those twisted after rolling (excl. in irregularly wound coils)	7214	6	6			5	1	
New pneumatic tyres, of rubber	4011	6	5	1		6		
Furniture and parts thereof, n.e.s. (excl. seats and medical, surgical, dental or veterinary furniture)	9403	5	5			5		
Structures and parts of structures "e.g., bridges and bridge-sections, towers, lattice masts, pillars and columns, roofs, roofing frameworks, doors and windows and their frames and thresholds for doors, shutters, balustrades", of aluminium (excl. prefabricated buildings of heading 9406); plates, rods, profiles, tubes and the like, prepared for use in structures, of aluminium	7610	5	3	2		4	1	
Bars, rods and profiles, of aluminium, n.e.s.	7604	5	3	2		4	1	
Wire of iron or non-alloy steel, in coils (excl. bars and rods)	7217	5	5			5		
Glass fibres, incl. glass wool, and articles thereof (excl. mineral wools and articles thereof, optical fibres, fibre bundles or cable, electrical insulators or parts thereof, brushes of glass fibres, dolls' wigs)	7019	5	5			3	2	
Plates, sheets, film, foil and strip, of non-cellular plastics, not reinforced, laminated, supported or similarly combined with other materials, without backing, unworked or merely surface-worked or merely cut into squares or rectangles (excl. self-adhesive products, and floor, wall and ceiling coverings of heading 3918)	3920	5	3	2		5		

2.3. Safeguards

A WTO member may restrict imports of a product temporarily (take “safeguard” actions) if its domestic industry is injured or threatened with injury caused by a surge in imports. Here, the injury has to be serious. An import “surge” justifying safeguard action can be a real increase in imports (an absolute increase); or it can be an increase in the imports’ share of a shrinking market, even if the import quantity has not increased (relative increase). Industries or companies may request safeguard action by their government. After a proper investigation, a government can, if the necessary conditions as above are met, restrict imports of the product from all sources (but not from a specific member or group of members). This means that, for example,

if there were 5 countries exporting a specific product into a country, and that country imposed a safeguard measure on this product, this safeguard measure affects five countries. In this sense, care should be taken when comparing the number of measures in, for example anti-dumping, where one anti-dumping measure affects only one exporting country. The WTO agreement sets out requirements for safeguard investigations by national authorities. The emphasis is on transparency and on following established rules and practices — avoiding arbitrary methods.¹² Data on safeguard actions drawn from WTO members’ notifications are available in the Integrated Trade Intelligence Portal and are the basis for the data shown here.¹³

Table 2.3.1 gives an overview of the (stock of) measures in effect as of 31 December 2020. It indicates the product coverage in terms of HS-6 digit codes. It also lists by country how many new investigations have been initiated and how many final measures have been put into effect.

Tables 2.3.2 and 2.3.3 show more specifically which product groups have been subject to final Safeguard measures.¹⁴ In table 2.3.2 the product categories follow the groupings used in this publication in Part A.2 of the tariff profiles whereas in table 2.3.3 more detailed HS chapters are used to show in detail which particular products are most frequently subject to final safeguard measures.¹⁵

Table 2.3.1. Safeguard measures in effect in 2020

Description of column headings

Country/Territory		Name of country/territory	
From 1 January to 31 December 2020	Investigations initiated	Number of investigations initiated by the country in 2020	
	Final measures imposed	Number of final measures imposed by the country in 2020	
As of 31 December 2020	Final measures in effect	Number of measures	Number of final measures in effect on products imported by the country as of 31 December 2020
		Products covered (Number of HS 6-digit)	Number of distinct HS 6-digit subheadings covered (fully or partially) by products on which final measures by the importing country were in force as of 31 December 2020

12. See also http://www.wto.org/english/thewto_e/whatis_e/tif_e/agrm8_e.htm#safeguards

13. See <http://i-tip.wto.org>

14. Please note that the sum of measures in Table 2.3.2 is higher than the sum of measures in Table 2.3.1. This is due to the fact that a number of individual measures cover products which fall in more than one product group. Therefore a single measure may be listed more than once in Table 2.3.2 as well as in Table 2.3.3.

15. The choice of the G-20 country grouping was made to align this report with the grouping chosen for the WTO trade monitoring reports.

Table 2.3.1. Safeguard measures in effect in 2020

Country/Territory	From 1 January 2020 to 31 December 2020		As of 31 December 2020	
	Investigations initiated	Final measures imposed	Final measures in effect	
			Number of measures	Products covered in HS 6-digit
Canada			1	2

Non-tariff measures:
Estimating analytical
indicators using
UNCTAD's Trade
Analysis Information
System (TRAINS)**

	Introduction	226
	Data availability and dissemination	227
	Use of NTMs	230
	Results and policy conclusions	231
	References	236
	Annex	237

Introduction

Data on non-tariff measures (NTMs) are a vital complement to tariff data as NTMs can be as important as tariffs in determining market access. Internationally comparable data on NTMs is scarce, but useful information is made available through UNCTAD's Trade Analysis Information System (TRAINS).

In contrast to transparency on tariff data, with countries regularly publishing information on the tariffs they impose, the opposite has been true for many non-tariff measures in areas such as quantitative restrictions and price restrictions. The importance of these measures has been recognized in many WTO agreements dealing with quotas and trade-protective measures, such as anti-dumping, safeguards or countervailing measures. The WTO Agreement on Sanitary and Phytosanitary Measures (SPS) and the Technical Barriers to Trade (TBT) Agreement also acknowledge the importance of trade regulations in the areas of food safety, protection of the environment, and consumer protection.

In recognition of NTMs' potential to affect trade, UNCTAD published 20 years ago the Database on Trade Control Measures, which contributed to the growing literature on quantification and analysis of the effects of NTMs (UNCTAD, 2002).

Subsequently, the data collection methodology progressed significantly, with the Multi Agency Support Team (MAST) developing what became in 2012 the International Classification of NTMs, which was updated in 2019 (see below).

As with tariffs, there is a need for comprehensive and internationally comparable data on NTMs. The main difficulty is that NTMs do not have numerical values. Instead, they are visible in legislation regulating conditions for the import or export of specific products, processing methods for these products or other factors. To have internationally compatible data, one common taxonomy for

NTMs was needed to allow for regular and consistent data collection.

UNCTAD's TRAINS database on NTMs provides this. Its data stem from legal requirements, established on a national basis, that can directly or indirectly affect international trade in goods. The TRAINS NTM database contains comprehensive data for 100 economies.¹ The data cover all requirements that can potentially affect international imports and exports of a specific product in a specific country and for a specific trading partner.

The TRAINS NTM database allows users to access information by product, type of measure, countries imposing the measure, those affected by the measure and several other variables.

This data set complements members' NTM notifications to the WTO. As these notifications are reported by the member applying the measure, it is difficult to compare across countries because of the countries' differing disciplines.

Moreover, not all trade-related measures need to be notified.² Also, not all notifications include the product code to which they apply. Notifications provide updates on newly introduced or proposed regulations but members are not obliged to notify all regulations currently in force. While the notifications are a key transparency instrument that is central to multilateral discussions on market access, the dataset is therefore incomplete and does not provide comprehensive "NTM profiles" that would reveal how countries use NTMs as policy tools, with or without the intention to affect trade. The TRAINS NTM database therefore fills important gaps.

UNCTAD actively collects comprehensive NTM data, working with its many national, regional and international partners. In its work with governments, strict quality control and comprehensiveness checks are conducted by UNCTAD's team to ensure that all applied regulations are identified. Each requirement for export

or import is registered in the database and classified according to the International Classification on NTMs. This classification was developed under UNCTAD's leadership with MAST (UNCTAD, WTO, International Trade Centre, the United Nations Industrial Development Organization, World Bank, the UN Food and Agriculture Organization, the Organisation for Economic Cooperation and Development, and the International Monetary Fund) and was recognized by the UN Statistical Commission (UNCTAD, 2012 and 2019).

This classification includes more than 150 different types of import measures and almost 30 different types of export measures. By using the International Classification on NTMs, the TRAINS NTM database therefore allows for a fine-tuned analysis. All regulations are coded according to the Harmonized System used for product classification. This allows traders, policy makers and researchers to identify all regulations that traders of any particular good have to comply with.

UNCTAD and its partners follow an elaborate methodology that standardizes the collection and classification approach across countries. This allows for comparable analysis across countries, products and time (UNCTAD, 2016).

The WTO contributes with data for "Contingent trade protective measures" (Chapter D of the classification) which comprises anti-dumping, countervailing measures and safeguard data. This information, based on members' notifications to the WTO, was deemed to be comprehensive and of high quality.

In addition, the WTO is part of the Global Trade Helpdesk (GTH), together with UNCTAD and ITC, that was launched in 2020. The GTH aims to bring together all available data on trade, tariffs and NTMs. Information from all participating organizations is presented in a consistent way. Information about regulatory requirements is mostly based on

1 Counting the European Union as one.

2 WTO agreements stipulate, for each policy area, specific notification requirements. For example, if a sanitary or phytosanitary (SPS) measure follows an international standard, it does not need to be notified.

UNCTAD's NTM data. The WTO contributes its notifications to the GTH and both datasets are interlinked.

The GTH provides a snapshot of all the requirements for import and export that are enforced at a certain point in time. For several countries, there are multiple years of data collection, while for others the data are more limited. The process of data collection, data description,

and available information, as well as strengths and limitations of the data, can be found in UNCTAD 2017.

The NTM data also is published in different formats³ through:

- the World Integrated Trade Solution (WITS)
- the Web Application Trade Analysis Information System

- STATA file for bulk download

Furthermore, inclusion in the database of NTMs derived from national requirements does not imply a judgement on the legitimacy or appropriateness of these requirements. NTMs are recorded in a neutral way with the purpose of fostering transparency for the policy tools that may affect international trade.

Data availability and dissemination

As of December 2020, UNCTAD's NTM data cover 100 economies,⁴ representing 90 per cent of global trade. Figure 1 illustrates the current coverage.

Data is presented for the "years of data collection" carried out in each country. Data were collected in

multiple years for some, such as Latin American countries, the European Union, Canada and the United States. For some countries, there are limited years available. For example, all Association of South East Asian Nations members have only two years of data collection: 2015 and 2018.

Each time data are collected for a country, all the NTMs in force at that point are registered in the database. Naturally, some of the regulations in force may be recent, while others may have been in force for many years. The date of implementation of the NTM is also registered. Table 1 shows the data availability.

Figure 1: Data availability of NTM data: Coverage

³ See UNCTAD (2017), Section 5, for more details.

⁴ Counting the European Union as one.

Source. Authors based on TRAINS.

The NTM data are made available through the following three portals:

- i. Trade Analysis Information System (TRAINS) at trainsonline.unctad.org: TRAINS provides data on NTMs at the HS 6-digit product classification. Users can search the database by country, type of NTM, affected product and partner country. It also contains information on the regulatory source and descriptions of the measures.

Moreover, researchers can bulk-download a STATA dataset with additional variables that is available upon request.

- ii. World Integrated Trade Solution (WITS) at wits.worldbank.org: WITS integrates TRAINS with other trade-related databases, such as United Nations COMTRADE, the WTO's Integrated Data Base (IDB) and the WTO's Consolidated Tariff Schedules (CTS). As a result, WITS offers an interface that provides access to databases covering imports, exports and protection data – tariff and non-tariff measures.
- iii. Global Trade Helpdesk

The data made available for statistical use are in STATA format, with

the analysis based on the unique combination of the variables below.

- i. Reporter country enforcing the NTM
- ii. Partner country
- iii. Product at HS6 level
- iv. NTM code at the maximum level of disaggregation (four digits)
- v. Year of data collection

This special topic focuses on cross-sectional data. Specifically, it focuses on the latest information available for countries in which data were collected, providing a snapshot of NTM regulation in each of these countries at the time of data collection.

Use of NTMs

The TRAINS NTM database can be used to produce statistics on the use of NTMs. Three basic indicators – frequency index, coverage ratio, and prevalence score – reveal the use of NTMs as policy instruments. They provide information on how often a country uses NTMs, the most common NTM types, and the nature of the most regulated sectors.

The data indicate the incidence and variety of NTMs used as policy tools. They do not reveal how much NTMs would cost to exporters and importers, nor if they restrict or enhance trade, and by how much. In some cases, NTMs could facilitate trade, especially when the requirement has been complied with already.

A joint UNCTAD and World Bank publication (UNCTAD, 2018) observed that developed countries tend to have deeper levels of regulation, covering more sectors and with a higher number of NTMs. The objective may be to ensure consumer safety or product quality. Chapters A and B, which cover SPS and TBT measures, are

used more frequently by developed countries. Less developed countries may not have any regulations indicated in these areas as some sectors might not be well regulated.

As well as revealing the policy tools in place by country, the data reveal which sectors are more or less regulated, and with which type of policy tool. Comparison of data between countries may be particularly useful when considering regional integration or market access issues. Major regulatory differences between trading partners may add difficulties for traders.

Finally, data may be used to test hypotheses in economic models and to indicate the possible impact of NTMs on trade. The data may also be used for other development or welfare analysis.

Range of indicators

The “Frequency Index” and “Coverage Ratio” are the two basic indicators used to measure the pervasiveness of NTMs in an economy. They are based on variables that take into account the

presence or absence of a measure on a certain product. A third indicator, the “Prevalence Score” (sometimes called the Intensity Index) looks into the use of a certain type of measure, i.e. the number of NTMs for a given product, the average number across a group of products, or the average number of NTMs for a given country.

- The **Frequency Index is essentially the percentage of products affected** by one or more NTMs.⁵
- The **Coverage Ratio is the share of trade subject to NTMs**. This index is also a ratio, but trade weighted.⁶
- The **Prevalence Score is an average of how many measures apply to a given product group**. It can be used, for example, to indicate which group of products is affected by the largest number of NTMs on average. For instance, it can reveal if agricultural products are affected more than industrial products, or to compare the average number of measures among various countries.

5 The frequency index is computed using the products that are effectively traded within the country, i.e., FI is the share of those imported products that have to face at least one NTM.

6 Usually, the Coverage Ratio is computed using the average trade value for the last three years (bilateral and by HS6), so that there would be less zero values. This is relevant because this indicator uses traded products only.

Results and policy conclusions

Figure 2 presents the average results for all the countries in the data set for 2019, or the latest year available in Table 1⁷, for import NTMs and export NTMs. Import NTMs are conditions or requirements for import into the country whereas export NTMs are regulations affecting the country's own exports, e.g. obtaining a permit before exporting a chemical product.

Almost 60 per cent of the imported products in the world need to comply with at least one NTM (first light red bar). This represents almost 80 per cent of the value of these imported goods (first red bar). Every imported product needs to comply with more than three NTMs, on average (first green diamond). Almost half of exported products need to comply with 1.3 NTMs, on average.

Figure 3 shows that developed countries have on average over four NTMs on each traded product. This affects around 80 per cent of trade. Developing countries and least developed countries (LDCs) have between two and three NTMs. Half of the regulations that affect exports are more prevalent in developing countries and LDCs than in developed countries, both in terms of trade coverage and in the number of NTMs in place.

Figure 4 shows NTMs by sector. In general, animal, vegetable and food products are highly regulated, with most of these products traded with at least one specific regulation. The intensity of regulations is also high for these products. They have on average 12 NTMs each.

Chemicals, textiles, vehicles, machinery and leather are also highly regulated sectors. A total of around 60 per cent of these products, representing 80 per cent of the imports in these sectors, need to comply with two to three NTMs. The indicators are lower for exports. Each animal, vegetable or food product that is exported has to comply with about two to three NTMs as a requirement from the exporter's own government.

Figure 2: Global results

Figure 3: NTM indicators, by development status

7 Indicators for Grenada, Liberia and Tajikistan were not estimated as the corresponding trade information was not available.

Figure 4: NTM indicators, by sector

Figure 5 provides information by region and sector group. Developed countries regulate more intensively the agri-food sector and manufactured products compared with developing countries and LDCs. While LDCs have, on average, seven NTMs for each imported agri-food product, developed countries have 13.

Figure 6 displays NTM indicators by country or territory. The indicators are calculated as a share of imported products. The frequency index and coverage ratio can be easily compared because both use the same set of products for each country.

Some developing countries have a very large share of their imported products affected by NTMs. Apart from the cost for traders to comply with regulations, there is also the added cost of bureaucracy. UNCTAD provides a toolkit to analyse the cost and effectiveness of the NTMs in place. The cost effectiveness toolkit implements surveys and in-depth interviews. Recommendations are then provided to streamline the regulatory framework and strengthen policy objectives in the areas of safety, security, and health while avoiding unnecessary cost and burdens to business.

For some countries, the frequency index is low, meaning that only a few of the imported products are affected by NTMs. For those countries, the prevalence score may also be low. This means that there are very few measures imposed on few products. However, the coverage ratio does not normally go below 25 per cent of the value of the country's imports.

Figure 5: NTM indicators, by development status and sector group

Figure 6: NTM indicators, by country or customs territory*

* Note: For full country name, please refer to Table 1.

Figure 7: NTM indicators, by type of measure

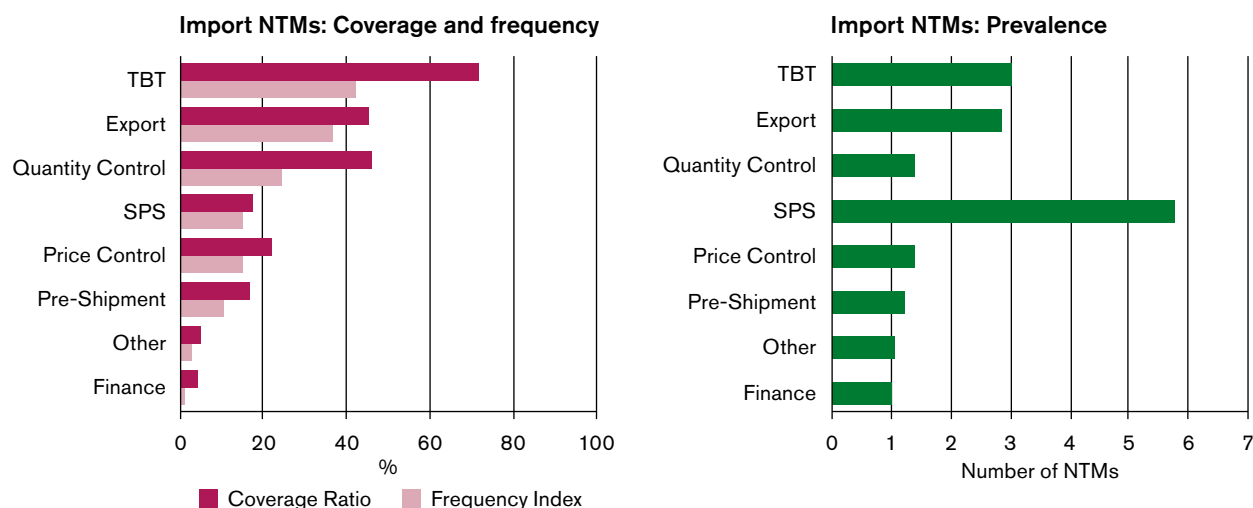

Figure 8: NTM indicators, by sector groups and type of NTM

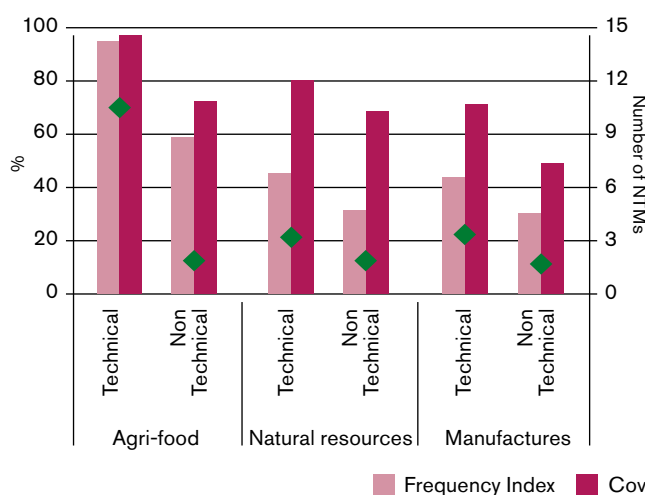

Figure 9: NTM indicators, by development status and type of NTM

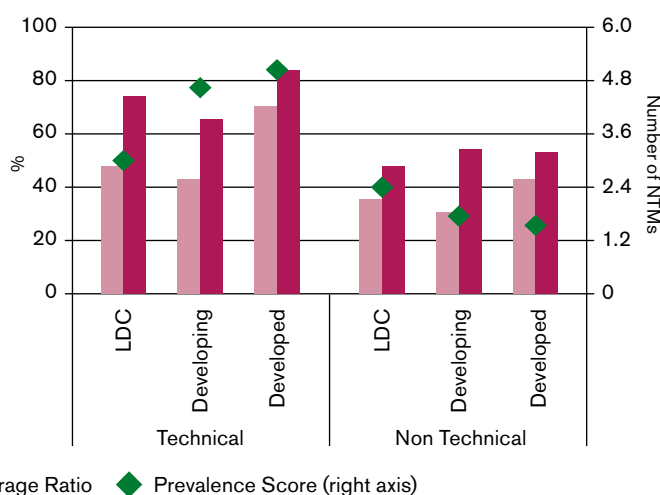

Figure 7 shows use of NTMs by type of measure. More than 40 per cent of the imported products in the world have to comply with at least one TBT measure, which represents more than 70 per cent of imports in 2019. A quarter of the imports in the world have to comply with requirements for licences, quotas or other quantity control measures. This represents half of the value of total imports. The share of SPS NTMs, which mostly concern food and agriculture products, is lower, at around 20 per cent of the global

value of imports. However, SPS has the highest value in terms of the prevalence score. Each imported product needs to comply with an average of almost six SPS measures, as opposed to three TBT NTMs on average.

SPS, TBT and pre-shipment inspection constitute “technical measures” while the other NTMs are considered to be non-technical. Figures 8 and 9 show that for all three sector groups, and for all three levels of development, technical measures are more widespread than non-technical

measures. Unsurprisingly, the agri-food sector has the highest level of technical measures. Developing countries impose a higher number of technical measures compared with developed countries but the values are similar, i.e. developed countries impose 4.8 technical NTMs on every product while developing countries impose 5.2 on average.⁸

For non-technical measures, LDCs impose the highest number, i.e. 2.3 measures on every product on average.

8 The Kingdom of Bahrain, the State of Kuwait, the Kingdom of Saudi Arabia, China, the Republic of Korea, Guatemala, India, Mauritius, Brazil and Thailand have the highest number of technical measures. Data is from 2015 or 2016 for the first five countries listed above.

Annex

Frequency Index

The **Frequency Index (FI)** is essentially the percentage of products affected by one or more NTMs. More formally,

$$F_i = \frac{\sum D_s M_s}{\sum M_s} \cdot 100$$

The Frequency Index is a ratio calculated using two dummy variables in the numerator: D_s , the presence (or absence) of an NTM on the product, and the M_s , which equals to 1 for every (traded) product. The sum in the numerator is the total “affected” products, and the denominator is the sum of all products; the Frequency Index is simply the ratio between them.⁹

Coverage Ratio

The trade **Coverage Ratio (CR)**, is the share of trade subject to NTMs.

It can also be computed for a country, or for a region, or a group of products. This Index is also a ratio, but trade weighted. Trade value is represented by V_s . The numerator captures the sum of the import (export) value of those traded products that are affected by an import (export) NTM. It is then divided by the total value of imports (exports).

$$C_i = \frac{\sum D_s V_s}{\sum V_s} \cdot 100$$

Usually, Coverage Ratio is computed using the average trade value for the last three years (bilateral and by HS6), so that there would be less zero values. This is relevant because this indicator uses traded products only.

Prevalence Score

The **Prevalence Score (PS)** is an average of how many measures apply to a given product group. It can be used, for example, to tell what group of products is affected by the largest number of NTMs on average. For instance, it can be computed to see if agricultural products are affected by more measures, compared with industrial products, or to compare the average number of measures among different countries.

The formula is similar to the previous cases; D_s is defined above, N_s is the number of NTMs on product s , and M_s is the total number of products (those with and without NTMs).¹⁰

$$P_i = \frac{\sum D_s N_s}{\sum M_s}$$

9 This simplified formula does not show that it also has a bilateral dimension, but the same principle applies. The products-partners affected in the numerator will equal 1, and all products-partners will count in the denominator.

10 This simplified formula does not show that it also has a bilateral dimension, but the same principle applies. In practical terms, it is double sum. If data are set for the triple “reporter-hs6-partner”, the Prevalence Score is the simple mean of the variable that presents the number of distinct codes for each row, considering the traded lines (rows with positive import values only).

B. Frequently asked questions	245

A. Data sources

The data was pooled from the following databases: WTO's Consolidated Tariff Schedules database (CTS) and Integrated Data Base (IDB) and ITC's MAcMap and TradeMap databases. Additional imports were sourced from the UN COMTRADE database when it has more updated data than WTO and ITC. The objective was to use for each country or customs territory the latest available information. For the summary tables and Part A of the tariff profiles, only applied tariffs for the years 2020 or 2019 and imports for 2019 or 2018 were retained. The

cut-off date for inclusion of new data in the publication was 31 May 2021.

For Part B in the tariff profiles more than 300 trade agreements with available data were included in the calculation of the preference margin and duty-free access. Some trade agreements that are currently in force have not been included for one or more of the following reasons: (1) the agreement – or the supplementary information to it – was not accessible (or the document was unworkable) at the time of the publication; (2) the data presented

some problems such as: missing product codes, the products codes of the agreement did not correspond to the product codes of the MFN tariffs of the country; or (3) the agreement entered into force after the country was uploaded in the Market Access Map database (in such cases the agreements will be included in the subsequent update of the database).

For more detailed information on the full contents of each of the respective databases, the reader is referred to the respective websites and/or documents:

1. For some countries, the data for a country period shown in the table could not be used because the data was incomplete, inconsistent and in the case of trade statistics, without corresponding tariff data.

B. Frequently asked questions

How do you choose the countries to include in the publication?

In each issue, we include all WTO members and some countries or territories for which there is available data for applied tariffs for the reference years. Non-WTO members included in the publication can vary from issue to issue depending on the availability of data on applied tariffs for the reference years. WTO members are always included.

Why is there no applied MFN tariff for some WTO members?

Unlike data on bound tariffs which are sourced from legal documents at the WTO, applied tariffs are based on notification of the member to the WTO or from the tariff database of either the ITC or UNCTAD, the two other institutions collaborating with the WTO on this publication. For each issue of the WTP, we use two reference years for the applied MFN tariff, usually the most recent two years. For example, in the WTP 2021 issue, the data on applied tariffs used are for 2020 and if these are not available, we use 2019. If neither of those years is available from any of the tariff database of the three institutions, the statistics referring to applied tariffs are left blank.

Why is there no statistic on binding coverage for AG products?

During the Uruguay Round of tariff negotiations all members were supposed to have bound all their tariff lines for agricultural products, hence binding coverage for AG is assumed to be 100%.

How do you calculate the tariff average when there are non-*ad valorem* tariffs?

Whenever there is a non-*ad valorem* duty in a certain country schedule, it is converted to its *ad valorem* equivalent (AVE) to the extent possible. For the methodology used in calculating the AVE, please refer to Technical Annex B of World Tariff Profiles 2006. As a caveat though, some non-*ad valorem* duties are too complex and the calculation of the AVE requires additional data not readily available (e.g. duty expressed as “9 + EA max 18.7 + AD S/Z”). In such cases, the duty is not included in the calculation of the tariff indicators.

Why is the applied tariff average higher than the bound tariff average?

(Related to this is the case when the maximum applied tariff is higher than the maximum bound tariff.)

When the bound tariff is lower than the applied tariff, it implies a binding violation. However, this is not always true. The following cases show why even if the calculated applied statistics are higher than the corresponding bound statistics, it is possible that there was no binding violation.

- The binding coverage might be less than 100% and the applied duties for unbound products may be high thus affecting the average and the maximum duty. Please note that the bound tariff average is based only on tariff lines that are bound. The applied duty average is based on the full tariff schedule following a certain Harmonized System (HS) nomenclature version. Some WTO members who acceded during the Uruguay Round had not fully bound their entire tariff schedule.
- The WTO member has only recently acceded and the concessions are still not fully implemented. As the bound duty statistics presented in the WTP refer to the final bound duty at the end of the implementation period, the applied duties could still be higher than the bound duties.
- The bound and applied tariff schedules are in different HS versions. For each WTO member, the publication uses the approved or certified bound tariff data in the most recent HS version. For example, a member who joined during the Uruguay Round has its original bound tariff schedule in HS 1992. On the other hand, applied tariff is in the HS version used by the member which in practice is usually the most current version of the HS (say, HS 2017). In order for the bound tariff information to be more aligned with the applied tariffs, the schedule of concessions is regularly transposed or adapted to newer HS versions. However, all the other members have to agree to the new schedule in a different HS version to ensure that no change in the concessions happened during the transposition. This process of certifying a schedule in a more recent HS version often takes a long time. Hence, it is more often the case that the bound tariff schedule is in an older version of the HS compared to the one used for the applied tariff. The difference in HS versions is not expected to have changed any of the member's commitments but might have affected the aggregate statistics due to the differences in HS subheading breakdown between versions.
- The national tariff line breakdown might be different between the bound and applied tariff schedules even within the same HS version, which could have affected the calculated averages. In the simple example below, the applied tariff schedule was more detailed than that for bound tariff thus having an average higher than the bound tariff even if there's no binding violation.

Bound and applied Tariffs for HS 2017 subheading 0804.50

(Guavas, mangoes and mangosteens, fresh or dried)

Bound Tariff			Applied Tariff		
Code	Description	Duty (%)	Code	Description	Duty (%)
0804.50.10	Mangoes	10	0804.50.11	Mangoes, fresh	10
			0804.50.19	Mangoes, dried	9
0804.50.90	Guavas and mangosteens	5	0804.50.90	Guavas and mangosteens	5
	Average	7.5		Average	8

- The *ad valorem* equivalents (AVE) may affect the comparison between bound and applied duties when the changes in nomenclature have resulted in the use of different unit values. Please refer to Technical Annex B of World Tariff Profiles 2006 for the methodology on the AVE calculation.
- For some WTO members who have commitments on Other Duties and Charges (ODCs), the data available on applied tariffs may include the ODCs, and it is not possible to separate the ODC from the import duty.

Why is my calculation for simple tariff average of a country different from the one in the World Tariff Profiles?

- If there are non-*ad valorem* duties, the calculation of AVEs for the WTP might be different from the calculated AVEs from other sources.
- The WTP uses two-stage averaging. First, the average of all national tariff lines within the same HS six-digit subheading is calculated and then the mean of all HS subheading averages is taken. This is to minimize the variability caused by the different national tariff line breakdowns within the subheading. All reporters using the same HS version would have the same number of subheading (i.e., second stage) averages from which the country average or sectorial or product group average is calculated.

My country did not change its applied tariff rates from that of the previous year but why did the average change?

- If there are non-*ad valorem* duties, the calculated AVEs could have changed because new reference years for imports are used every issue.
- Even without non-*ad valorem* duties in a tariff schedule, it's possible that the breakdown changed for some reasons but the applied tariff rate for each product remained the same. Please see the example below on the average for HS subheading 0804.50 which changed because of the difference in the breakdown of tariff lines.

Year 1 Applied Tariff			Year 2 Applied Tariff		
Code	Description	Duty (%)	Code	Description	Duty (%)
0804.50.10	Mangoes	10	0804.50.11	Mangoes, fresh	10
			0804.50.19	Mangoes, dried	10
0804.50.90	Guavas and mangosteens	5	0804.50.90	Guavas and mangosteens	5
	Average	7.5		Average	8.3

Why are there maximum values that are italicized?

To differentiate between a maximum based on an *ad valorem* tariff and one based on an AVE, the value of which can vary depending on the unit value of the product for the reference period, the maximum value based on an AVE is italicized.

Why does the same year for applied tariff appear for two consecutive WTP issues?

For each issue of the WTP, we use two reference years for the applied MFN tariff, usually the most recent two years and select the latest year available. There is always a one-year overlap on the reference years for consecutive issues of the WTP. For example, for WTP 2021, the reference years for tariff are 2020 and 2019 and for WTP 2020, they are 2019 and 2018. If, during the preparation for WTP 2020, the 2019 data for Country X is already available, then 2019 data is used. However, if for WTP 2021 Country X has no available data yet for 2020 in any of the databases, the data for 2019 is re-used.

Why does the same year for applied tariff appear for two consecutive WTP issues but with different statistics?

The answer to why the same year appears for two consecutive WTP issues is in the previous question.

The reason why the statistics differ could be the presence of non-*ad valorem* duties in the tariff schedule. Different reference years on imports are used for the calculation of AVEs for each issue and hence the AVEs can change.

Another reason could be that the reporter itself revised the data previously submitted for the relevant year.

Why did the bound tariff statistics differ from the WTP issue of the previous year?

In theory, bound tariffs do not change unless there is a renegotiation of a Member's commitments. Hence, the most intuitive answer would be that the Member renegotiated some or even all of its commitments during the course of the year.

However, there could be other reasons why, even if there were no changes in the commitments, some aggregate statistics changed. One of these could be the presence of non-*ad valorem* duties in the bound tariff schedule. Different reference years on imports are used for the calculation of AVEs for each issue and hence the AVEs can change.

Another reason could be the use of an approved schedule in a more recent HS version. Please refer to the question "why is the applied tariff average higher than the bound tariff average?" for additional explanation.

My country imports mostly from partners with whom we have a free trade agreement and imports come in duty free. Why is the calculated trade weighted average much higher than what is expected?

The trade weighted average presented in Part A.1 of each tariff page is based on applied MFN duty weighted by total imports and does not take into consideration non-MFN duties (mostly preferential) applied to certain trading partners. In effect, this is the trade weighted average assuming all imports are levied the MFN rate.

In Part B, the statistics show that exports from my country to a certain partner (i.e. imports of the partner from my country) do not enjoy preference as reflected by the preferential margin and % duty free imports. However, in reality our exports enjoy preferential rates in this market. Why don't the statistics show this?

The market access statistics calculated in Part B require complete information on non-MFN tariff regimes which each market or importer applies to each of its import partners. However, there are non-MFN or other preferential tariff regimes which are not officially notified to the WTO nor are these available in the other tariff databases. The statistics are based only on non-MFN tariff regimes for each market for which we have data.

How can I get the EXCEL version of the tariff profiles and summary tables for previous WTP issues?

At present there is no online facility yet to extract these tables. However, these can be requested from the Market Access Intelligence Section of the WTO. Send your email request to mai@wto.org specifying which data years or WTP issues you are interested in.

Acknowledgements

Acknowledgements are due to all the data providers, mostly national administrations or WTO delegations who have made this information available including through notifications presented as a special topic. In a number of cases, data has been made available on national websites or through regional organizations. Given the vast amount of statistical data and metadata that needed to be processed, and because this information is not available in one single organization, this publication was only possible as a joint effort of the WTO, ITC, and UNCTAD. Each of the three organizations has a proven track record and comparative strengths in the field of tariff analysis.

The WTO, as the repository of its members' binding commitments on goods and also as repository for members' notifications in a number of trade policy areas, has been at the core of this undertaking. Trade and tariff data were sourced from either the WTO or ITC databases depending on which one had the most recent tariff or trade data for the years covered. In addition, the ITC contributed all the AVE estimates and preferential duties. Missing trade data for some countries were also

sourced from the UN Commodity Trade Statistics Database (COMTRADE).

The preparation of this publication was coordinated by Dayong Yu (WTO) and Adelina Mendoza (WTO) in close collaboration with Mondher Mimouni (ITC) and Ralf Peters (UNCTAD). Janvier Usanase (WTO) was responsible for calculating the tariff indicators and generating the statistical tables. Jung-Ah Kang (WTO) worked on formatting and putting together all the different parts of the publication. Xavier Pichot (ITC) was in charge of providing the input dataset and of calculating the AVEs. At the ITC, thanks are also due to the data collection team coordinated by Karla Del Real Cañamar as well as to Dzmitry Kniahin and Mampindra Antonia Ngavozafy for data processing.

The technical paper for this edition's special topic was prepared by Denise Penello Rial (UNCTAD), and benefitted from contributions from Samuel Munyaneza and other members of the Trade Analysis Branch at the UNCTAD.

The UNCTAD NTMs TRAINS database is a product of the Trade

Information Section in the Trade Analysis Branch of UNCTAD's Division on International Trade and Commodities. The views expressed in this paper are those of the authors and do not necessarily reflect those of the United Nations or its Member States. Any errors remain the authors' own. The data are not official government data and are the sole responsibility of the authors.

Dayong Yu (WTO) prepared the statistical tables on antidumping measures, countervailing duties and safeguard actions. Thanks are also due to Staff of the WTO Rules Division for their comments and suggestions for the technical annexes.

Finally, the contributions of the WTO Information and External Relations Division, specifically Mr. Serge Marin-Pache and Mr. Anthony Martin and WTO printing facilities for the production and the French and Spanish translators in the Language Services and Documentation Division for rendering the publication in the WTO's other official languages are also hereby acknowledged.

If you would like more information on the contents of this report or if you have any comments or suggestions for improvement please contact the Market Access Intelligence Section (mai@wto.org).

World Tariff Profiles 2021 provides comprehensive information on the tariffs and non-tariff measures imposed by over 170 countries and customs territories. The publication starts with a breakdown of the tariffs imposed by these economies. Tariff data are presented in comparative tables and in one-page profiles for each economy. A summary table on selected indicators on the imports and exports profile for these economies is also presented. Statistics on non-tariff measures by country and by product group complement the data on tariffs. The special topic deals with estimating analytical indicators related to non-tariff measures using UNCTAD TRAINS data.

The publication is jointly prepared by the World Trade Organization, the United Nations Conference on Trade and Development (UNCTAD) and the International Trade Centre (ITC).
